NOTIFICATION.

Simla, the 18th October 1917.

No. 1760.—The following gracious message from His Imperial Majesty the King Emperor to the Joint Committee of the Order of St. John of Jerusalem and the British Red Cross Society is published for general information :—

"During past twelve months I have had constant opportunity of witnessing afresh both at home and in Flanders the great work of mercy carried out by united efforts of the British Red Cross and the Order of St. John.

"In every theatre of the war regardless of distance, discomfort or danger, the task of alleviation, removal of pain and suffering and of ministering to those in need is performed with unparalleled devotion by men and women who have taken service under the Red Cross.

"The prompt and unstinted provision of medical and general stores and comforts is an all-important work and one of the main responsibilities undertaken by the Joint Committee.

"In hospitals and convalescent Homes, hospital trains, motor ambulances and launches our sick and wounded as well as those of our Allies are I know indeed grateful for the aid and co-operation which the Joint Societies bring to the medical services of the armies, nor have the needs of our prisoners of war been forgotten in allocation of your funds.

"I trust therefore that there will be no falling off of generous financial support on the part of every one at home and in Dominions Overseas without which this work cannot be maintained.

"During the war I have had great satisfaction in sending to the Joint Committee on October 20th a donation of five thousand pounds. This year for 'Our Day' collection on eighteenth it is a pleasure to me to contribute ten thousand pounds to mark my appreciation of what has been achieved by the British Red Cross Society and the Order of St. John in the past and my deep sense of the importance in continuing these achievements in the future."

RESOLUTION—No. 2209T.R.

READ—

The Report of the Department of Fisheries, Bengal and Bihar and Orissa, for the year ending the 30th June 1917.

IN May 1917 the Department of Fisheries was inaugurated as a separate department, and Mr. T. Southwell who, as Deputy Director of Fisheries, had formerly been subordinate to the Director of Agriculture, was appointed to be Director of Fisheries. Mr. Mohsin, one of the two Superintendents of Fisheries, resigned his appointment towards the end of the year under report: his place has since been filled.

2. The improvement of fisheries, as stated in Mr. Southwell's report, involves the solution of two main problems, the increase in the number of fish available and the organisation of the trade in fish; in other words, the department has to deal with fish and with fishermen. The most important aspect of the past year's work is the increased attention which has been paid to the problems of fishermen. The number of co-operative societies among fishermen has grown from 7 to 12. Much interest attaches to the formation of a co-operative society among a few fishermen in a large Government fishery in the Ganges in the neighbourhood of Rajmahal, and to the attempt to arrange for the sale of their catches in Calcutta without the intervention of middlemen. The financial results were so successful that the fishermen received Rs. 14 a maund for their fish in place of Rs. 5, but the members of the society with whom the fishery was settled gave up fishing and sublet the fishery to others. It is evident that much patient work will be necessary before the spirit of co-operation can be developed; and it will probably be necessary to form small societies for strictly limited areas. The work done in connection with this society led to enquiries about the conduct of the fish trade in Calcutta and disclosed the difficulties which are encountered by small traders in bringing consignments of fish to Calcutta and selling them there. The arrangements which have been made for providing better facilities for the education of fishermen's children in two villages in Dacca district constitute a step in the right direction.

3. There has been a notable extension of the useful work of supplying carp fry for cultivation in tanks, the quantity supplied amounting to 6 lakhs of fry compared with 2½ lakhs in the previous year: as the fry are paid for by the public, it is obvious that they are found satisfactory. The completion of the carp tanks at Delabagh in Arrah district will improve the supply of pure fry, and the success in the artificial cultivation of catla gives promise of making it possible to avoid the introduction of predatory fish which is the chief obstacle to the successful cultivation of fish in tanks. The very necessary investigation into the habits of hilsa was continued: artificial cultivation, however, was not achieved, and no discovery of economic value as regards hilsa has yet been made.

4. The statistics of fish imported into Calcutta, which are now compiled in a systematic and comprehensive manner, show marked fluctuations: in the year under review the total imports show an increase of 44 per cent. over the largest amount imported in any of the previous four years: the increased imports from the Chilka Lake are remarkable.

5. The Governor in Council is pleased to hear of the increase in the number of enquiries made from the Department by the public. He recognizes that Mr. Southwell has to deal with very large problems with the aid of a very limited staff, and shares his opinion that there is a great future for the fisheries of Bengal. His thanks are due to Mr. Southwell for his patient labours of the past year.

By order of the Governor in Council,

L. BIRLEY,

Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE LAND REVENUE ADMINISTRATION OF THE PRESIDENCY OF BENGAL FOR THE YEAR ENDING 31ST MARCH 1917.

REVENUE DEPARTMENT.

LAND REVENUE.

DARJEELING, THE 24TH OCTOBER 1917.

RESOLUTION—No. 2196T.R.

READ—

The Report of the Board of Revenue on the Land Revenue Administration of the Presidency of Bengal for the year ending 31st March 1917.

THE Hon'ble Mr. F. J. Monahan held charge of the office of Member of the Board of Revenue from the 1st April to the 25th October 1916, and the Hon'ble Mr. C. J. Stevenson-Moore, C.V.O., for the rest of the year.

2. **General conditions of the year.**—The outturn of crops and the material condition of the people were generally satisfactory. Famine relief operations in Bankura were closed in November 1916, and a bumper crop of winter rice restored normal conditions. Except in small areas which suffered from floods, the harvests in the districts of Tippera, Mymensingh and Noakhali which had suffered from floods in the previous year were excellent. In the districts of Burdwan, Birbhum and Midnapore and in the Chittagong Hill Tracts some damage was caused by floods at the end of September, and relief measures on a small scale were found necessary. The total amount advanced during the year under the Agriculturists' Loans Act was Rs. 8,39,291, the bulk of which was distributed in the districts of Bankura, Burdwan and Noakhali. Out of Rs. 70,985 advanced under the Land Improvement Loans Act, Rs. 67,585 were expended in Bankura. Suspension of rent and cesses to the extent of about Rs. 21,000 was sanctioned for the two Government estates, Chaora and Kukua, in the district of Bakarganj.

3. **Land Revenue demand and collection.**—The current demand was Rs. 2,77,87,002, the increase of nearly 2 lakhs over the preceding year being mostly due to new settlements, re-settlements and progressive increase of demands in temporarily-settled and Government estates. The collections amounted to Rs. 2,77,47,134, or 99·85 per cent. of the current demand and 93·77 per cent. of the total demand. Remissions amounted to Rs. 72,710.

4. **Road and Public Works Cesses.**—There was an increase of Rs. 1,43,851 in the current demand owing to revaluation proceedings and annual revision of assessment of mines. The percentage of total collection on the current demand was almost the same as in the previous year, being 100·8 against 100·6, and 13 districts against 14 in the preceding year attained the standard of 100 per cent. on the current demand.

Valuations or revaluations, partial or complete, were made in 11 out of the 25 districts in which the Act is in force and were completed in 6. Revaluation operations conducted by the Settlement Department were also in progress in the districts of Dacca, Noakhali and Rajshahi. The question of the modification of the special procedure for making cess revaluations simultaneously with the preparation of record-of-rights is still under consideration.

The current demand of land revenue for the cess-paying districts is more than 2½ crores, and the gross rental on which the cesses are based is nearly 12½ crores. The land revenue is thus about 20 per cent. of the rental.

5. **Coercive measures.**—The number of estates which defaulted in the payment of land revenue and became liable to sale was 11,030, or over 1,400 less than that of the previous year. The largest number of defaults occurred in the districts of Chittagong and Midnapore. Only 981 estates, or less than 9 per cent. of the estates which defaulted, were actually sold, against 1,087

in 1915-16. Sales were proportionately most numerous in the Hooghly and Dacca districts. The number of certificates filed, inclusive of those for cess, was 1,05,814 against 96,639 in the preceding year. The number of cess certificates decreased by 1,964, but there was an increase in the number of revenue certificates by 11,139, which was shared by many districts and was due to various local causes. The number of cases pending at the close of the year showed a decrease of 2,073.

In the majority of cases payments were made on the issue of notices or on attachment of property ; and it was necessary to resort to actual sale in only 3,461 cases, or 3·2 per cent. of 107,887 cases disposed of during the year.

6. **Condition of the raiyats in Government estates and expenditure on improvements and education.**—The condition of the tenants in Government estates was generally satisfactory during the year. The total number of estates under direct management, including those of private individuals managed by Government was 2,281, with a current demand of Rs. 42,80,162. Out of Rs. 62,800 expended on miscellaneous and sanitary improvements, nearly two-thirds were for drainage, irrigation and embankments. There were 2,241 schools attended by 75,998 pupils in the Government estates. The expenditure on roads and communications in Government estates was Rs. 3,09,195, of which Rs. 70,335 were met from the Government 1½ per cent. grant and the rest from local funds.

7. **Waste lands.**—The rules for the grant of waste land leases in the 24-Parganas and Khulna portions of the Sundarbans continue to be in abeyance. Experimental raiyatwari settlements on the lines of the Bakarganj colonization scheme are being made in certain lots of the 24-Parganas Sundarbans by a specially selected officer. In the Bakarganj portion of the Sundarbans 638 new colonists were settled on 24,805 bighas of land, against 416 colonists on 24,070 bighas in the previous year. The progress of this scheme is satisfactory.

8. **Drainage, irrigation and embankments.**—No important drainage or irrigation projects were undertaken. The problem of mitigating the severity of the floods of the river Damodar in the districts of Burdwan, Hooghly, Howrah and Midnapore is receiving the attention of Government ; and work in connection with the Damodar Reservoir Enquiry Survey is in progress. The Gumti embankments in the district of Tippera, which are maintained by zamindars, were breached by floods, and extensive damage was done to the crops in the inundated area. With a view to improve the embankments it is proposed to put them under the charge of Government with the consent of the zamindars.

9. **Partitions.**—Forty-eight cases were instituted during the year and 273 were pending at the end of the previous year. Fifty cases were disposed of and 271 were pending at the close of the year.

10. **Working of the Bengal Tenancy Act.**—No new facts came to light in the working of the Bengal Tenancy Act. The levy of *abwabs* and of legal cesses at rates in excess of those prescribed by the law, and the failure to grant proper rent receipts are still prevalent. The record-of-rights is appreciated by tenants and assists them in combating illegal claims of landlords. There was an increase in the number of rent money-orders issued, but the amount covered by them decreased. The percentage of money-orders refused by landlords rose from 16·9 in the preceding year to 19·1 in the year under report. The Bill to amend the law relating to the transferability of occupancy holdings by aboriginals has been introduced in the Bengal Legislative Council, and the Bill relating to the transfer of occupancy holdings generally is still under consideration.

11. The thanks of the Governor in Council are due to the Board for its efficient administration of the Land Revenue Department during the year.

By order of the Governor in Council,

L. BIRLEY,

Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE ADMINISTRATION OF WARDS', ATTACHED AND TRUST ESTATES IN THE PRESIDENCY OF BENGAL FOR THE BENGALI YEAR 1323 (1916-17).

REVENUE DEPARTMENT.

LAND REVENUE.

DARJEELING, THE 27TH OCTOBER 1917.

RESOLUTION—No. 2211T.R.

READ—

The Report of the Board of Revenue on the Administration of Wards', Attached and Trust Estates in the Presidency of Bengal for the Bengali year 1323 (1916-17).

Number of Estates under management.—Two new estates were taken charge of and four estates were released, leaving 55 estates under the management of the Court of Wards at the end of the year, against 57 in the preceding year.

2. **Payment of revenue and cesses.**—The total amount of revenue and cesses due to Government, including arrears, was nearly 14 lakhs, of which about 13 lakhs or 93 per cent. was paid, against 92·1 per cent. in the preceding year. The heaviest balance, due by the Tagore estate, is attributed to the unsatisfactory financial condition of the estate.

3. **Rent and cesses due to superior landlords.**—An improvement was made in the payment of rent and cesses due to superior landlords, the amount paid being 83·2 per cent. of the amount due against 79·6 in the previous year. The balance of Rs. 95,071, out of a total demand of Rs. 5,85,290, is said to be due mainly to disputes regarding title and interests of superior landlords, non-adjustment of accounts, and accumulation of petty dues allowed by superior landlords.

4. **Collection of rent and cesses.**—There was a satisfactory increase in the percentage of collections on current demand from 94·5 in 1915-16 to 110·7 in 1916-17. The standard of 100 per cent. was exceeded in all the divisions, the highest percentage (117·7) being attained in the Chittagong Division. The outstanding balances due to all estates aggregate over 57 lakhs or 138·8 per cent. on the current demand, against 145·8 per cent. in the previous year. The balances exceeded the current demand in all but the Rajshahi Division. They are expected to be considerably reduced on the conclusion of the settlement operations in certain districts and on the release of the Tagore estate as a result of the decree obtained by the mortgagees against the estate.

The numbers of civil suits and certificates filed during the year for the recovery of rent and cesses due to Wards' estates increased by 612 and 1,580, respectively, over those of the preceding year. Out of 4,529 civil suits for disposal, 3,777 were disposed of, but less than one-third of the decretal amount was realised. Of the total number of certificates for disposal nearly three-fourths were disposed of and 66·8 per cent. of the total claim was realised against 54·7 per cent. in the previous year.

5. **Debts of Estates.**—The total liabilities of the estates under the management of the Court of Wards were over 90 lakhs, of which over four lakhs were paid off during the year. Eight estates are encumbered to the extent of nearly 78 lakhs. The decree obtained by the mortgagees against the Tagore estate, of which the debts amount to over 20 lakhs, has become

absolute, and the properties will shortly be put up to auction. The special officer appointed to ascertain the exact liabilities of the Bhawal estate has not yet finished his enquiries : a large proportion of the 18½ lakhs of debts of this estate represent the claims of one proprietor against another.

6. **Cost of management and expenditure on improvements.**—The percentage of cost of management on the current demand of estates rose from 12·6 to 13. The standard of 10 per cent. was exceeded in all the divisions except the Chittagong Division. The question of the reduction of the high cost of management (16·7 per cent.) in the Janbazar estate has been taken up by the Collector of the 24-Parganas. The total expenditure on improvements, schools and dispensaries was Rs. 1,68,837 or 4·08 per cent. of the current demand. In accordance with the instructions issued by the Board last year agricultural demonstrations in Wards' estates are being carried out under the supervision of the officers of the Agricultural Department.

7. **Education of wards.**—The education of wards received due attention and progress was generally satisfactory. In accordance with the scheme for giving minors under the Court of Wards some training in survey and settlement work, a son of a ward attended the training camp during the field season of 1916-17.

8. The thanks of the Governor in Council are due to the Board for its efficient administration of the estates under the Court of Wards. Miss Cornelia Sorabji, Lady Adviser to the Court of Wards, has done useful work in affording the ladies of the zenanas of Wards' estates, the benefit of her advice in various matters, particularly with regard to the health, comfort and education of these ladies and of minor wards. The good work of the managers commended will be noted.

By order of the Governor in Council,

L. BIRLEY,

Secretary to the Govt. of Bengal.

Sixthly :—It is ordained that the names of those upon whom We may be pleased to confer this Decoration shall be published in the *London Gazette*, and that a Register thereof shall be kept in the Office of Our Principal Secretary of State for War.

GOVERNMENT OF BENGAL.

BENGAL LEGISLATIVE COUNCIL.

NOTIFICATION.

No. 1077L., dated the 5th November, 1917.—His Excellency the Governor having been pleased to order, under rule 31 (*1*) of the Bengal Legislative Rules, 1912, the publication of the following Bill, together with the Statement of Objects and Reasons which accompanies it, in the *Calcutta Gazette*, the Bill and Statement of Objects and Reasons are accordingly hereby published for general information. It is proposed to introduce the Bill and refer it to a Select Committee at the meeting of the Bengal Legislative Council to be held on Tuesday, the 20th November, 1917 :—

THE BENGAL PUBLIC DEMANDS RECOVERY (AMENDMENT) BILL, 1917.

BILL

to amend the Bengal Public Demands Recovery Act, 1913. Ben. Act III of 1913.

WHEREAS it is expedient to amend the Bengal Public Demands Recovery Act, 1913, in order to provide for a more effective method of realising the contributions to the assets of a Co-operative Society under liquidation and the costs of such liquidation ;

It is hereby enacted as follows :-

Short title. 1. This Act may be called the Bengal Public Demands Recovery (Amendment) Act, 1917.

Amendment of section 5 of Bengal Act III of 1913.

2. After sub-section (*1*) of section 5 of the Bengal Public Demands Recovery Act, 1913, the following shall be inserted, namely:—

"Provided that no action shall be taken under this Act on a requisition made by a liquidator in pursuance of an order under clause (*b*) or clause (*d*) of sub-section (*2*) of section 42 of the Co-operative Societies Act, 1912, unless the requisition be countersigned by the Registrar of Co-operative Societies, Bengal." [*Cf.* Bihar and Orissa Act IV of 1914, s. 5(*1*), proviso.]

II of 1912.

Amendment of Schedule I.

3. After article 12 of Schedule I to the said Act, the following shall be inserted, namely:—

"12-A. Any sum ordered by a liquidator appointed under sub-section (*1*) of section 42 of the Co-operative Societies Act, 1912, to be recovered as a contribution to the assets of a society or as the cost of liquidation." [*Cf.* Bihar and Orissa Act IV of 1914, Sch. I., Art. 14.]

II of 1912.

STATEMENT OF OBJECTS AND REASONS.

Under sub-section (*5*) of section 42 of the Co-operative Societies Act, 1912 (II of 1912), the orders made by the liquidator of a Co-operative Society, the registration of which has been cancelled, have to be enforced by the Civil Court. It is of very great importance that the dues of societies which are proved failures should be collected and their liabilities paid off as early as possible. To secure this end, it has become imperative to adopt a procedure for realising the dues of these societies under liquidation, which will be quicker and more efficacious than the ordinary Civil Court procedure. The Eighth Session of the Bengal Provincial Conference unanimously recommended that the provisions of the Bengal Public Demands Recovery Act, 1913 (Bengal Act III of 1913), be made applicable to Co-operative Societies under liquidation, so that the orders of the liquidator may be enforced by the certificate procedure. A somewhat similar provision was brought into force in the Province of Bihar and Orissa by the Bihar and Orissa Public Demands Recovery Act, 1914.

It is proposed, therefore, to amend the Bengal Public Demands Recovery Act, 1913, by inserting a new clause in Schedule I to the Act, so as to allow the application of the Act to the orders of a liquidator under clauses (*b*) and (*d*) of sub-section (*2*) of section 42 of the Co-operative Societies Act, 1912. To prevent any possibility of abuse of this provision, it is proposed to add a proviso to sub-section (*1*) of section 5 of the Bengal Public Demands Recovery Act by which the requisition for a certificate by a liquidator can be enforced under this Act only if it is countersigned by the Registrar of Co-operative Societies, Bengal.

The Administration Report on the Howrah Bridge for the year 1916-17.

ON the 31st March 1916 the balance sheet of the Bridge showed a deficit of Rs. 3,32,024, which has been carried forward as a debit on Revenue Account.

The presence of this debit combined with the necessity for providing for a probable deficit on working account attributable to a decline in receipts and to the heavy expenditure to be incurred on the structural repairs to the Bridge itself, led to the appointment by Government of a special Committee for a consideration of the means for improving the finances of the Bridge. The income of the Bridge during the year 1916-17 amounted to Rs. 2,50,546 against Rs. 1,95,365, the actuals of the preceding year. The increase is mainly due to the fact that the East Indian Railway offered to increase their contribution to a minimum of Rs. 2 lakhs as earnings from Railway traffic, as a result of the deliberations of the said Committee.

The expenditure for the year amounted to Rs. 4,51,455. This amount includes the abnormal expenditure of Rs. 2,13,556 on special renewals to the Bridge structure and repairs to Howrah Ferry landing stage. The net working result was a deficit of Rs. 2,00,908, so that the aggregate debit on all accounts on the 31st March 1917 stood at Rs. 5,29,775. In consequence of this state of affairs Government have decided on the re-imposition of a terminal fee of 2 pies per maund on grains and seeds traffic over the Bridge to and from Howrah, with effect from 1st April 1917. This increase will, it is anticipated, result in additional revenue to the extent of about Rs. 1,50,000 per annum and should yield a surplus on working account which will gradually extinguish the present debit.

2. The number of vessels that passed through the Bridge during the year 1916-17 and four preceding years is shown below :—

	1916-17.	1915-16.	1914-15	1913-14	1912-13
Sea-going vessels ...	61	80	75	87	93
Inland steamers and flats ...	2,806	2,704	2,422	2,887	2,906
Steam-tug and steam-launches	886	897	805	569	670
Port Commissioners' vessels	27	39	71	44	63
Government steamers and flats	9	9	...	20	15
Total ...	3,789	3,729	3,372	3,607	3,837

2. The total number of accidents during the year was 17 against 11 in the preceding year.

3. The Bridge was opened on 308 occasions, of which 41 were during the day and 267 at night.

4. Owing to the war it cannot be said for certain when the construction of the new Bridge, which is under consideration, will be definitely taken in hand. In November 1916, at the instance of Government, Mr. Basil Mott visited Calcutta to examine local conditions at the site of the Bridge and to advise Government on the best type of bridge suited to the locality and the traffic using the river. His report is awaited. The existing Bridge is an old structure, and the immediate renewal and repair of certain structural parts was a pressing necessity. The Port Commissioners, Calcutta, with the sanction of this Government, accepted the tender of Messrs. Jessop & Company for the repair work, but the Company were unable to push on with the work as rapidly as desirable, owing to the restrictions imposed on the export of iron and steel from England.

By order of the Governor in Council,

F. A. A. COWLEY,

Secy. to the Govt. of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS FOR THE PORT OF CALCUTTA FOR THE YEAR 1916-17.

GOVERNMENT OF BENGAL.

MARINE DEPARTMENT.

CALCUTTA, THE 31ST OCTOBER 1917

RESOLUTION No. 3152Marine..

READ—

Letter No. 4571, dated the 3rd September 1917, from the Vice-Chairman, Port Commissioners, Calcutta, submitting the Administration Report for the Port of Calcutta for the year 1916-17.

General Features of the Administration.—As in the preceding year the war considerably affected the import and export trade of the Port. The loss of traffic was compensated to some extent by development in trade with Japan, and in a minor degree, with the United States of America. By reason of the heavy loss of the ordinary revenue of the Trust, since the beginning of the war, the Port Commissioners with the sanction of Government introduced the levy of special war surcharges to make up the deficiency.

The effect of the war on the trade of the Port will be evident from the following comparative statistics of traffic :—

	1913-14.	1914-15.	1915-16.	1916-17.
	Tons.	Tons.	Tons.	Tons.
I.—Net tonnage of the Port ...	4,256,987	3,705,160	2,967,798	2,804,680
II.—Jetties, Imports ...	1,186,797	917,978	788,431	686,010
III.—Docks, Imports ...	613,876	700,133	570,997	444,210
IV.— „ General Exports ...	1,231,589	920,659	1,054,985	1,185,159
V.— „ Coal „ ...	3,017,180	2,633,805	1,610,645	1,789,482

The decrease in the net tonnage of the Port and in imports at the Jetties and Docks is significant. The improvement in exports at the Docks is due to a large business on Government account in gunnies, manganese and pig iron. There was also an increase in the export of coal at the Docks as compared with the previous year.

Income.—The income from ordinary sources during the year amounted to Rs. 1,30,62,532, or Rs. 1,75,241 less than that of the previous year. This was supplemented by the special war surcharge amounting to Rs. 26,60,897 as against Rs. 26,97,683 in 1915-16. The total income thus amounted to Rs. 1,57,23,432, which was less than that of the preceding year by Rs. 2,12,024.

Under the following heads the receipts fell appreciably below the estimate for the year :—

	Actual.	Estimate.	Decrease
	Rs.	Rs.	Rs.
Jetties ...	17,31,701	17,67,650	35,949
Inland Vessels Wharves	4,22,698	4,51,480	28,782
Railway ...	15,70,062	15,98,000	27,938
Dry Docks ...	2,38,060	2,50,500	12,440
River Dues ...	16,60,582	18,15,625	1,65,043
War surcharges ...	26,60,897	28,50,000	1,89,103

This decrease was more than counterbalanced by increases over the budget estimate under other heads the principal of which are the following :—

	Actual.	Budget.	Increase.
	Rs.	Rs.	Rs.
Tea Warehouse ...	3,37,168	2,62,500	74,668
Rentable lands and buildings.	8,13,632	7,94,100	19,532
Wet Docks ...	41,31,446	37,69,380	3,62,066
Port approaches ...	5,96,074	5,75,600	20,474
Ferry service ...	4,33,361	4,10,000	23,361
Sale of unserviceable materials.	54,844	20,000	34,844

Expenditure.—The expenditure on Revenue Account amounted to Rs. 1,56,31,738 as against Rs. 1,51,35,847 estimated for the year and Rs. 1,49,07,001, the actual expenditure of the previous year. After meeting the debit of Rs. 60,035 with which the year opened, there was left a small credit balance of Rs. 31,658 to carry forward to 1917-18.

The actual expenditure noticeably exceeded the budget estimate for the year under the following heads :—

	Actual	Estimate.	Increase
	Rs.	Rs.	Rs.
Control ...	9,97,085	9,69,135	27,950
Tea Warehouse ...	1,39,986	1,23,271	16,715
Inland Vessels Wharves	1,81,413	1,68,767	12,646
Rentable land and buildings.	1,40,095	1,28,479	11,616
Port ...	6,51,164	6,36,613	14,551
Port approaches ...	8,82,621	8,19,148	63,473
Railway ...	13,12,187	12,61,166	51,021
Wet Docks ...	30,55,657	26,38,702	4,16,955
Ferry Service ...	3,47,793	3,34,906	12,887
Depreciation of Government Promissory Notes of Reserve Fund at market rate.	3,96,740	.....	3,96,740

The expenditure showed a decrease of Rs. 5·88 lakhs under Interest and Sinking Fund charges, attributable chiefly to countervailing interest on capital moneys in hand, the expenditure of which has been retarded by war conditions.

Jetties.—The tonnage handled at the jetties during the year amounted to 6,86,010 against 788,431 in 1915-16 and 917,978 in 1914-15. The total earnings came up to Rs. 14,33,623, of which 84 per cent. was paid by goods and 16 per cent. by vessels.

Docks.—During the year 1,018 vessels were berthed at the Docks (of which 65 were Government transports) as against 905 vessels in the previous year (of which 26 were Government transports). The total number of vessels that entered empty and loaded exports was 383 as against 354 of the previous year. There was, however, a marked increase in the number of vessels that entered empty and loaded coal. The total imports and exports in tons landed and shipped over the Dock quays were 444,210 and 2,974,641, respectively, as against 570,997 and 2,665,630 of the previous year.

Docks traffic.—The tonnage of sugar imported, 177,965 tons, was the lowest since 1908-09 but that of rice, 244,778 tons, although much less than in 1914-15 and 1915-16, was higher than in any other preceding years.

The tonnage of exports, 2,974,641 tons, slightly improved as compared with the previous year, 2,665,630 tons. The noticeable figures of improvement are those under gunnies, 100,951 tons which constitutes a record, and under miscellaneous, 408,591 tons. The rise of tonnage under the latter is, as already stated, attributable chiefly to the increased shipment of manganese ore (230,509 tons) and of pig iron (97,808 tons). The export of wheat and seed was far from satisfactory and that of jute and tea showed some reduction. There was a slight improvement in the export of coal.

Petroleum Wharf at Budge-Budge.—Eightly-seven vessels discharged kerosine oil at the Budge-Budge Petroleum wharf against 99 in the previous year.

In addition to kerosine, batching and other oils were landed there, amounting to over 18 million gallons as against 16 million gallons in the preceding year. The total revenue of the depôt amounted to Rs. 4,16,879, or a decrease of Rs. 7,910 as compared with the earnings of the previous year.

Tea Warehouse.—The tea traffic showed a decrease of 344,750 packages. This drop in traffic did not, however, affect the income which showed an increase of Rs. 40,753 as compared with the previous year, due to increased earnings for storage.

Ferry Service.—Three of the Commissioners' steamers were utilised by Government for portions of the year. There was a rise in the number of passengers carried, resulting in a slight improvement in earnings.

Engineering.—The Port Commissioners exercised the strictest economy on all maintenance and repairs works; but the actual expenditure could not be kept within the budget provision owing to the unusually high prices of materials.

Of the works in progress the three trial wells at Garden-Reach deserve mention. The work proceeded satisfactorily, and the knowledge obtained should be of much help in the preparation of detailed plans for the construction of the New River Entrance to the King George's Docks.

Of the five Garden Reach berths, only one berth, viz., the Coaling Jetty replacing the old Jetty at Brace Bridge Hall, was completed and opened in June 1916.

Port and Port approaches.—The condition of the four governing bars was satisfactory. The Eastern Gut Bar reached its worst point in June 1916 on account of the temporary absence of the dredger, but rapidly improved after the return of the dredger and the arrival of the freshets.

The light ships were maintained during the year. A new unattended light vessel, the *Planet*, was completed and placed on station in the Upper Gasper Channel in May 1916. To facilitate night navigation an additional attended light vessel was placed in the Gabtola Channel, the buoys were re-arranged, and an automatic tide gauge and electric semaphore apparatus, designed by Mr. Reaks, Officiating River Surveyor, were erected at Phuldhobi. Since February 1917 all lights have been extinguished under the orders of Government for reasons in connection with the defence of the Port.

Capital Expenditure.—The amount actually spent on capital account was less than was anticipated, *i.e.*, Rs. 38·50 lakhs as against Rs. 70·8 lakhs of the budget estimate. This was due to the restrictions imposed in April 1916 on the export of iron and steel from the United Kingdom. The expenditure was met from the opening balance of Rs. 53·5 lakhs, supplemented by a loan of Rs. 50 lakhs which was obtained from the Bank of Bengal under special arrangement, a portion of the credit balance having been utilised to finance the Suspense Account and to meet the debits incurred by the Bridge Commissioners on the working of the Howrah Bridge.

Capital Account.—The Capital debt of the year was Rs. 10,80,56,688, while the sum of the value of the property according to the Block Account and of the balance of the Capital account was Rs. 14,40,04,267.

In addition to these assets there are three other funds of the Commissioners which constitute important assets of the Trust. These are the Reserve Fund, the Depreciatton Fund and the Fire Insurance Fund. The total assets at credit of these funds on 31st March 1917 was Rs. 35,38,587.

General.—Mr. H. J. Hilary, Vice-Chairman, proceeded to England on combined leave at the commencement of the year. Subsequently he received the sanction of the Commissioners and of Government to the acceptance a commission in the Field Artillery. He was serving in France at the close of the year, since when the Governor in Council has received with the deepest regret the news of his death in action on the 3rd June 1917.

As to the officers and servants of the Port Commissioners there were altogether 14 members of the supervising staff and 39 members of the subordinate staff serving with His Majesty's Forces either in the Army or the Navy. Lieutenant E. E. Grimwade, who served the Trust for 6½ years as Assistant Traffic Manager, lost his life in action in France. Ten officers received Commissions in the Indian Army Reserve of Officers.

The Governor in Council desires to take this opportunity of thanking the Commissioners, and specially Mr. S. C. Williams, who officiated as Vice-Chairman throughout the whole of the year, for so ably carrying out the work of the Trust particularly in circumstances of such stress and strain as created by the war.

ORDER.—Ordered that copies of the Resolution be forwarded to the Government of India and to the officers and departments concerned and that it be published in the supplement to the *Calcutta Gazette* for general information.

By order of the Governor in Council,

F. A. A. COWLEY,

Secretary to the Govt. of Bengal.

(GENERAL)

THE following Royal Warrant is published for general information, in supersession of the Royal Warrants published with the Resolutions in this

GEORGE R. I.

GEORGE THE FIFTH, by the Grace of God, of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas, King, Defender of the Faith, Emperor of India, to all to whom these Presents shall come, Greeting !

WHEREAS His late Majesty King Edward VII, being desirous of distinguishing by some mark of His Royal Favour the many heroic acts performed by those of His faithful subjects who endanger their own lives in saving or endeavouring to save the lives of others from perils incurred in mines or quarries or otherwise in connection with Industrial Employment in His Dominions and in Territories under His protection and jurisdiction, did by Warrants under His Sign Manual bearing date respectively the 13th July, 1907, and the 1st December, 1909, for Himself, His Heirs and Successors institute and create a new Medal to be entitled the Edward Medal to be awarded for such acts of gallantry :

And whereas We are desirous of amending the rules governing the award of the said Decoration and of consolidating the Royal Warrants relating to the said Decoration, We are graciously pleased to make, ordain and establish the following Rules for the governance of the said Decoration :

1. It is ordained that the Medal shall be styled "The Edward Medal," but when it is awarded for acts of such great and exceptional gallantry as to merit a special decree of recognition it shall be styled "The Edward Medal in Silver."

2. It is ordained that the Edward Medal shall consist of a circular Medal with Our Effigy on the obverse, and on the reverse a suitable design with the words "For Courage"; and that the Medal shall be of Bronze or, when the Edward Medal in Silver is awarded, of Silver.

3. It is ordained that the Edward Medal shall only be awarded to those of Our faithful subjects who endanger their own lives in saving or endavouring to save the lives of others from perils incurred in connection with Industrial Employment in these Our Dominions, and in Territories under Our protection or jurisdiction, and such awards shall be made only on a recommendation to us by Our Principal Secretary of State for the Home Department.

4. It is ordained that the names of those upon whom We may be pleased to confer either of these Decorations shall be published in the *London Gazette*, and that a Register thereof shall be kept in the Office of Our Principal Secretary of State for the Home Department.

5. It is ordained that each Medal shall be suspended from the left breast, and the riband, of an inch and three-eighths in width, shall be dark blue with a narrow yellow stripe on either side : Provided that when the Medal is awarded to a woman it shall be worn on the left shoulder, suspended from a riband of the same width and colour fashioned into a bow.

6. It is ordained that any act of gallantry which is worthy of recognition by the award of the Edward Medal, but is performed by one upon whom the Decoration has already been conferred may, on a recommendation to Us by Our Principal Secretary of State for the Home Department, be recorded by a Bar attached to the riband by which the Medal is suspended : and for every such additional act an additional Bar may be added.

7. In order to make such provision as shall effectually preserve pure these most honourable Decorations, it is ordained that if any person on whom either of such Decorations is conferred be guilty of any crime or disgraceful conduct which, in Our judgment, disqualifies him for the same, his name shall, by an especial Warrant under Our Royal Sign Manual, be forthwith erased from the Register of those upon whom the said Decoration shall have been conferred and his Medal shall be forfeited. And every person to whom the said Medal is given shall, before receiving the same, enter into an agreement to return the same, if his name shall be so erased as aforesaid under this regulation. It is hereby further declared that We, Our Heirs and Successors, shall be the sole judges of the circumstances demanding such forfeiture. Moreover, We shall at all times have power to regrant a Medal to any person whose Medal may at any time have been forfeited.

8. The Warrants of the 13th July, 1907, and 1st December, 1909, are hereby revoked.

BY THE KING.

A PROCLAMATION.

GEORGE R. I.

WHEREAS by Section 1 of "The Exportation of Arms Act, 1900," it is enacted that We may by Proclamation prohibit the exportation of all or any

of the following articles, namely, arms, ammunition, military and naval stores, and any article which We shall judge capable of being converted into or made useful in increasing the quantity of arms, ammunition, or military or naval stores, to any country or place therein named whenever We shall judge such prohibition to be expedient in order to prevent such arms, ammunition, military or naval stores, being used against Our subjects or forces or against any forces engaged or which may be engaged in military or naval operations in co-operation with our forces :

And whereas by section 1 of "The Customs (Exportation Restriction) Act, 1914," it is enacted that section 1 of "The Exportation of Arms Act, 1900," shall have effect whilst a state of war in which We are engaged exists as if, in addition to the articles therein mentioned, there were included all other articles of every description :

And whereas We have deemed it expedient to revoke the said Proclamation dated the 18th August, 1916, and to prohibit the exportation to Sweden, Norway, Denmark, and the Netherlands, of all articles whatsoever other than those hereinafter excepted :

STATEMENT OF OBJECTS AND REASONS.

The present Bill, which practically recasts the whole of the Indian Income-tax Act, 1886 (II of 1886), has a three-fold purpose. In the first place, it remedies certain inequalities in the assessment of individual taxpayers under the existing law, which have become especially apparent since a graduated scale of the tax was introduced by Act V of 1916. Secondly, it defines more precisely than the existing Act the methods whereby income and profits of various descriptions are to be calculated for income tax purposes, so removing a defect which has led to some lack of uniformity in the assessing standards of different provinces. And, lastly, it effects a number of improvements in the machinery of assessment which experience has shown to be essential for the efficient and equitable working of the tax.

2. The recent introduction of gradu ted rates of income tax makes it nec essary to abandon the system of assessing the tax separately on the different sources of income falling under the four Par's of the second schedule to Act II of 1886, since with this system an assessee deriving his income fr.m more than one source may be called on to pay appreciably less than a person of equal taxable capacity who possesses one s urce of income alone. One of the main objects of the present Bill is accordingly to bring together all sources of an as-essee's income f r the purpose of de'ermining the rate at which he shall be as-essed on each part of it. This object is effected by clause 14 and schedule I of the present Bill, which provide that the rate at which the tax shall be assessed on all income which under the provisions of the Act is chargeable to the tax (called taxable income) shall be determined by the total income, enjoyed by the assessee, to which the Act applies.

3. A distinction is drawn by the provisions in chapter I and schedule I of the Bill between "total income" which determines the rate at which the tax is levied, and "taxable income" which determines the amount on which the tax is levied. *The rate at which the tax is levied* on an assessee will be determined by his total income accruing, arising or received in British India (or deemed to do so under the Bill) after omitting therefrom the receipts specified in clause 3 (2) and deducting the allowances mentioned in clauses 8, 9 (2), 10 (2), and 11 (2) of the Bill; and also omitting under clause 4 of the Bill, the expenses incurred in earning agricultural income, including any land revenue payment, and the first thousand rupees of net agricultural income. In calculating *the amount on which the tax is levied* these reductions will also be made: but an assessee will further be entitled to subtract from the residual amount—

(*i*) Any salary which fulfils the conditions of clause 6 (1) (*i*) of the Bill.

(*ii*) Any sums which he has spent on the purchase of an annuity or for similar insurance purposes, provided they fulfil the conditions laid down in clauses 6 (1) (*ii*) and 12 (2) of the Bill.

(*iii*) Under the proviso to clause 7 of the Bill, any interest which he has received from a security of the Government of India issued or declared to be income-tax free.

(*iv*) Under clause 12 (1) of the Bill any interest which he has received as a member of a company, or of a firm or undivided Hindu Family, where the tax has been paid or is payable, by the company, firm, or family.

(*v*) Agricultural income.

4 Of these items of abatement only that relating to agricultural income calls for any special comment.

As has already been explained in paragraph 1 above, the Bill is a Bill to improve the machinery of assessment, and to remove existing inequalities in the burdens which the tax lays on individual assessees except in so far as improved methods of assessment will result in a higher revenue, the Bill is not designed, either by altering the rates of the tax or otherwise, to raise money, and for this reason it retains the existing exemption from the tax of agricultural incomes. But with the present system of income-tax graduation, under which an assessee's rate of assessment increases in accordance with his means, it is obviously equitable that in assessing the rate on which a person should pay on his non-agricultural income his income from agriculture should be taken into account: otherwise, a wealthy landlord possessed also of some non-agricultural income might pay on the latter at rates intended only for the poor. Accordingly, the Bill provides for the inclusion of net agricultural income in "total income": but as a concession, more particularly to persons of small means, clause 4 lays down that the first thousand rupees of net agricultural income shall not be taken into account in determining either the rate of the tax or the amount on which it will be levied.

5. The income determining the assessment, both as regards the rate and amount of the tax, will, under clause 14 of the Bill read with the definition of "year of assessment" in clause 2, be that actually accruing in the twelve months preceding the financial year for which the assessment is made, or at the assessee's option, any period of twelve months for which his accounts have been made up ending within the year preceding that financial year. Under the existing Act the tax chargeable on account of "salaries" and "interest on securities" is deducted at the time of payment of the salary or interest by the officer responsible for making the payment, and this procedure will be continued. But such deductions will, under clause 15 of the Bill, be treated merely as payments in advance on account of the assessment to be made in the following year; and, if it is found that any deduction has been effected at a rate which is not that applicable to the assessee's total income, an adjustment will be made at that assessment. In addition, the existing procedure for obtaining refunds of income-tax deducted from interest on securities is retained by clause 36 of the Bill.

6. Under the existing Act it is not incumbent on a Collector to obtain from any assessee a return of his income, and where the income is estimated at less than two thousand rupees, the assessee is not ordinarily served with a personal notice of assessment. The result is that many persons have no opportunity of representing the amount of their incomes before an *ex-parte* assessment has been made on them, and they have to seek recourse to a petition to the Collector, if they consider their assessment inequitable. Now that there as of taxation have

been enhanced, it is desirable, in the interests both of assessees and of Government, that Collectors should obtain returns of income in all cases before they make an assessment, and should also, if they doubt the correctness of any return, call such evidence as may be necessary to test it before coming to their decision. Clause 17 of the Bill accordingly provides for the service by the Collector of a notice on every person whom he proposes to assess to income tax, requiring him to furnish a return of his income ; and clause 18 enables the Collector to call upon an assessee to produce evidence of the correctness of his return. In addition, clause 18 empowers the Collector to utilise any evidence bearing on the assessment which he may obtain of his own motion, while under clauses 26 and 27 he can enforce the attendance of any person, including the assessee, for this purpose and compel the production of the information that he requires. Clause 21 requires personal notices of assessment to be sent to all assessees.

7. Assessments conducted in this manner should be made with much greater certitude than hitherto and it becomes unnecessary to retain the procedure, whereby a person objecting to his assessment by the Collector petitions the Collector against it : all evidence now produced before the Collector in objection proceedings will, under the provisions of the Bill, be available to him at the earlier stage when the assessment is being framed. A petition against an assessment finally made by the Collector will, therefore, under clause 22 of the Bill, lie only to the Commissioner, but such petitions will subject to the conditions of that clause, be allowed universally and will not, as at present, be confined (subject to the Commissioner's discretion) to cases in which the tax assessed is Rs. 250 or upwards.

8. Section 31 of the existing Act, providing that an assessee may compound for the tax over a series of years has been omitted. Compositions already made will not be affected, and Collectors will be empowered, either by rule or executive order, to make similar arrangements in future subject to such conditions as it may be thought fit to lay down.

9. Section 33 of the existing Act, providing in certain circumstances for amendment of assessment has also been omitted. This section is no longer required, now that the tax is based on income actually accruing.

10. The Bill contains a number of other alterations in and additions to the present law : these are, where comment appears to be necessary, discussed in the Notes on Clauses, appended to this Statement.

NOTES ON CLAUSES.

[*Where sections are mentioned, the reference is to the Indian Income Tax Act (II of 1886).*]

Clause 3 (2) (i).—Section 5 (1) (*c*) of the Act has been expanded to make it clear that income derived from property employed for religious or public charitable purposes is only exempt from income tax to the extent to which it is applied to those purposes, and also to make it clear that voluntary dedications are not exempt.

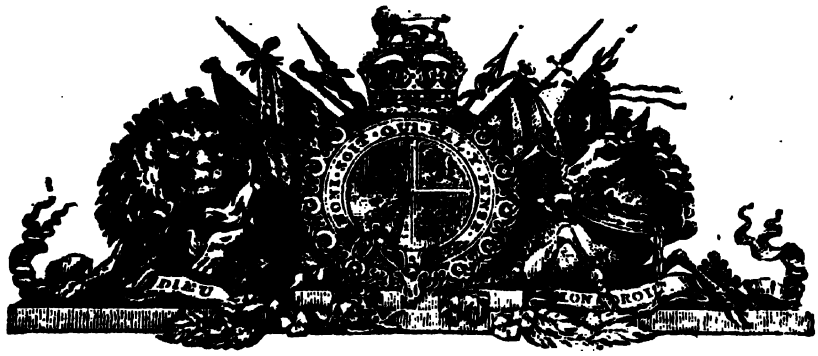
Clause 3 (2) (ii), (iii) and (iv).—These exemptions are already in force either by rule or practice.

Clause 3 (2) (vi).—Under this sub-clause, following the English practice, the recipient of a voluntary contribution or gift will not be liable to income tax on it, while the donor will not be permitted to claim an allowance on its account in calculating *his* total or taxable income.

Clause 6 (1).—The term "salaries" is, for the purposes of the Bill, confined by this clause to salaries, annuities, etc., from which income tax is deducted at the source. Salaries, etc., paid by private employers, who have not made arrangements with the Income Tax Collector for deducting the tax at the time of payment, will, therefore, be assessed under clause 11 as "income derived from other sources."

Clause 8.—Section 24 of the Act is expanded so as to apply to all house property, whether occupied by the owner or not, and the allowances which can be claimed are specifically stated, as in the past there has been some diversity of practice in the matter. It will be observed that no allowance can be claimed on account of municipal taxes.

Clause 9 (2).—The allowances which can be claimed in computing profits are specifically stated to prevent the diversity of practice which has occurred in the past.



Clause 29.—This clause has been adopted from the English law and provides for the separate taxation of the independent income of married women.

Clause 32.—Much difficulty has been experienced in the past in adequately assessing the Indian profits of foreign non-resident companies or firms trading in India either through branches, or through subsidiary companies or firms, or through agencies. Sub-clause (2) of this clause, which follows the lines of the English law, *viz.*, section 31 (3) of the Finance (No. 2) Act of 1915, is designed to meet the cases of these non-resident companies or firms, and it is proposed, when the Bill becomes law, to issue a rule under clause 43 (2) (*d*), which will enable them to be taxed on a percentage of their turnover, or on some proportion of their total profits taken to represent the Indian profits, if their actual Indian profits cannot be ascertained in any other way.

Clause 52.—This clause has been adopted with necessary modifications from sections 57 to 59 of the Indian Stamp Act (II of 1899).

DEPARTMENT OF COMMERCE AND INDUSTRY.

(EMIGRATION.)

RESOLUTION.

Delhi, the 16th November 1917.

The following paper is published in accordance with Rule 29 of the Assam Labour Board Rules :—

Annual report on the working of the Assam Labour Board during the year ending the 30th June 1917.

I.—Administrative.

Membership of the Board and Executive Committee.

1. Lieutenant Colonel W. M. Kennedy, C.I.E., I.A., Chairman of the Board, proceeded to England on deputation in April 1917, and Mr R. W. Davies, I.C.S., Madras, was appointed to officiate as Chairman during his absence. Lieutenant-Colonel Kennedy did not resume charge of his duties as Chairman till the 10th September 1917, after the close of the year under report.

Alterations in the Act and Rules.

2. At the instance of the Board, rule 24 of the rules for the working of the Board was amended by notification of the Government of India in the Department of Commerce and Industry, No. 6534-Emi., dated the 9th June 1917. This rule, which deals with the collection of the cess, has now been much simplified: Superintendents of Emigration have been relieved of the duty of furnishing monthly returns of labourers in respect of whom cess is leviable except in the case of those recruited by garden-sarders working independently of a local agent, and Supervisors have been made responsible for checking, during the course of their tours, the cess collected through the medium of local agents.

Meetings of Board.

3. Two meetings of the Board were held during the year under review, namely, on the 18th September 1916 and 20th March 1917. The following members were unavoidably prevented from attending :—

September Meeting.—Messrs. N. M. Ross, E. H. Hannay and the Hon'ble Sir E. H. Bray.

March Meeting.—The Hon'ble Mr. H. B. Fox, the Hon'ble Sir E. H Bray and Mr. R. T. Fraser.

Meetings of Executive Committee.

4. Two meetings of the Executive Committee attended by all the members were held, viz., on the 18th September 1916 and 20th March 1917.

Board's office.

5. Sanction was accorded to the strengthening of the Board's office establishment by the addition of one clerk on Rs. 60—4—80. A Provident Fund was established for the staff, and minor improvements were made in the prospects of the clerks.

During the year 2,646 letters were received and 4,668 letters issued.

Tours of Chairman.

6. The Chairman was on tour for 107 days, and the Acting Chairman for 51 days. In addition to interviewing Local Governments and District Officials, 20 local agencies and 4 transport agencies were inspected in the course of these tours.

In March the Chairman paid a visit to Delhi by desire of the Government of India.

Supervisors.

7. With effect, respectively, from the 25th and 12th April 1917, the services of Messrs. Craven and McPherson, Supervisors, were placed at the disposal of the Government of Bihar and Orissa for employment with Labour Corps, leaving the Board with one Supervisor only (Mr. C. E. Middleton Stewart), whose headquarters have been transferred temporarily to Calcutta as being more central. A single Supervisor is insufficient for the adequate performance of the inspection, preventive and miscellaneous work of the Board, which is spread over six provinces, but it was felt that the claims of war work were paramount. Suitable substitutes for the two Supervisors, whose services have been relinquished, are not as yet forthcoming, and this, also, is largely due to the effect of the war.

The following table shows the touring and inspection work done by the Supervisors :—

	No. of days inspected.	Number of Stations visited.	Number of Local Agencies inspected.		Number of Transport Agencies inspected.	
				More than once.	Once.	More than once.
Mr. J. McPherson (from July 1916 to April 1917).	219	21	15	2	4	1	5
Mr. C. H. Craven (from July 1916 to April 1917).	134	19	13	7	8	...	1
Mr. C. E. Middleton Stewart ...	251	18	16	5	8	...	1

In addition to the inspection of local agencies and transport agencies, the Supervisors were of much service in smoothing over local difficulties. They were, also, engaged, as before, in the detection and prevention of abuses and in several cases assisted at the prosecution of offenders in Court. They did much useful work, that of Mr. (now Captain) McPherson being specially meritorious.

II.—Supervision of Local Agents.

Appointment of Local Agents.

8. There were altogether fifty-seven applications for the grant of licenses as local agents ; in forty-eight cases the Board recommended that licenses should be granted, in five the applications were withdrawn, and in two cases the Board recommended that the applications should be rejected. The recommendations of the Board were accepted by Superintendents of Emigration in all cases except one, in which a license was issued to a person whom the Board were unable to recommend. The recipient has, however, recently resigned his license. Two applications were pending with the Board at the end of the year and have since been disposed of.

At the close of the year fifty persons held local agents' licenses, forty-four of them being employes of the Tea Districts Labour Supply Association, and six of individual employers or firms or combinations of firms. The special local agencies of Messrs. Barry and Company at Berhampore and of the Barduar Tea Estate at Ranchi ceased to work during the year.

Conduct of Local Agents.

9. Owing to the appointment of Supervisors the work of local agents was subjected to much closer supervision than in the previous year ; it was, as a rule, satisfactory. The license of no local agent was cancelled, but one agent resigned his license in order to avoid cancellation. In one case, an application for the renewal of a license was not proceeded with, since the holder's conduct was not satisfactory in a matter outside his duties as local agent. As in the previous year, defects which came to light in the course of inspection were readily remedied on their being brought to the notice of those concerned.

System of remuneration of Local Agents.

10. Reference was made in paragraph 16 of last year's Report to the system of remunerating local agents. The Board are glad to be able to state that at the close of the year all local agents received fixed salaries, only, with the exception of one, who, in addition to a fixed salary, was granted a commission on each recruit. The local agent referred to has since ceased to work.

It is a matter for regret that, owing to financial stringency following upon the falling off in recruitment, the Tea Districts Labour Supply Association have been compelled temporarily to reduce the salaries of their staff, and to effect other economies. The Association have also been obliged to ask their constituents to come to their assistance with the object of enabling them to tide over a period of financial difficulty. This assistance, the Board understand, has been largely afforded. Over 90 per cent. of the recruitment for Assam is carried on under the auspices of the Association, and the Board would regard it as a great misfortune should the members decide to wind it up. A proposal is on foot to reorganise the Association by broadening the basis of membership in order that the tea industry, as a whole, may be more widely represented on the Committee. Any measure which could strengthen the Association would be welcomed by all persons interested in clean recruitment. A central recruiting Association of some description is a necessity, since, if individual estates or companies or combinations thereof were to appoint their own local agents, the result would be chaos, and the competition among the garden-sardars of the different agencies to obtain recruits could not but give rise to abuses.

Licensing of Local Agents contrary to the recommendations of the Board.

11. In paragraph 17 of the Report of the previous year allusion was made to the fact that the Government of India had been addressed with the object of securing to the Board a veto on the appointment of local agents. That Government after considering the replies of Local Governments, decided to leave it to the latter to issue, if they so desired, executive instructions that no local agents' license should be granted without the favourable recommendation of the Board, this decision being, however, subject to the reservation that before the procedure is finally adopted it should be reconsidered by the Local Governments concerned after a year and a report made to the Government of India. The Governments of Bengal, Madras, the United Provinces and the Central Provinces have acceded to the request of the Board. In the province of Bihar and Orissa should a Superintendent of Emigration wish to issue a license to a person whom the Board are unable to recommend, he will refer the case to the Local Government for final orders.

III.—Recruitment.

General results of the year.

12. As was anticipated, the results for the year fell far short of those for the year 1915-16. From the 1st July 1916 to the 30th June 1917 cess was paid on 33,759 adult labourers, who were recruited by 28,317 garden-sardars as compared with 56,588 adult labourers recruited by 37,849 garden-sardars between the 21st August 1915 and the 30th June 1916. (These figures do not agree with those given in paragraph 20 relating to realisations on account of cess, since cess accruing in June is not received by the Board till July and is, accordingly, accounted for in the year succeeding that under report.) In all areas the results compare unfavourably with those of the previous year; they were best in the districts of Ranchi and Singhbhum, which (including the neighbouring Feudatory States) supplied about one-half the total recruits. It will be observed that the average number of recruits per garden-sardar diminished very considerably. The main reason for the falling off in numbers is the fact that agricultural conditions were generally good. The results, also, of the previous season having been unusually favourable, certain estates had a sufficiency of labour and consequently sent down fewer garden-sardars. In the latter half of the year recruitment for War Labour Crops was partly responsible for the diminution in the number of recruits, while the general financial stringency obtaining throughout the tea industry, consequent upon the difficulty of disposing of tea owing to shortage of freight, tended towards the restriction of recruiting operations.

Prospects for the year 1917-18 are still less favourable. Larger numbers of persons are being recruited for service for the combatant and non-combatant branches of the Army, agricultural conditions are generally good and the financial position of the tea industry is still unsettled. The numbers of absconding

garden-sardars have increased considerably. This has rightly or wrongly led to the impression that a good many of them have been recruited for Labour Corps, and concerns are, therefore, reluctant to risk further loss of labourers who have been imported at great expense. In this connection it may be mentioned that the recruiting authorities for war purposes in the provinces from which Assam chiefly draws its labour, have agreed not to accept absconding garden-sardars as recruits and to grant facilities for their identification. In view of the abovementioned difficulties most of the larger Calcutta Agency Houses at one time issued instructions prohibiting recruitment altogether or drastically restricting it. It is hoped, however, that the difficulties of the financial situation may soon be surmounted and Agency Houses are issuing instructions that recruitment should be resumed, at any rate to a moderate extent. The tea industry have no desire to compete in any way with recruitment for war purposes, but it is necessary, with a view to the future, to maintain connection with the recruiting districts. Moreover, to cut off the coolies in Assam from communication with their old homes would be liable to arouse discontent on the tea estates.

The Tea Districts Labour Supply Association have offered to assist, in any way possible, in the recruitment of War Labour Corps, and the Board have also afforded such help in this matter as has been asked of them.

Measures affecting recruitment.

13. Difficulties have arisen in working the areas in the Madras Agency Tracts lately thrown open to recruitment, the chief being that of determining whether coolies who wish to be sent down as garden-sardars originally came from villages in the open or closed areas It is not easy for the tea-planters in Assam to distinguish between these areas, the boundaries being somewhat indefinite. It is understood that villages are not permanently located in the same place, and in some cases there are several hamlets bearing the same name, some within and some beyond the area thrown open. An additional complication arises owing to the fact that most of the coolies from these areas were obtained through contractors, before the areas were thrown open, with the result that their names and addresses are often incorrect. By arrangement with the Agent to the Governor in Ganjam, sardars for the open area are sent down and their names and addresses are tested locally, those belonging to the area still closed being returned in Assam. Objection was taken on the part of the Agency Tracts authorities to the emigration of single males without their families, who were liable to fall into a state of destitution. The authorities concerned were informed that in such cases, if necessary, an absolute guarantee would be given to return a male recruit after six months' residence in Assam in order to enable him to bring up his family or to remain at home should he not be satisfied with the work and prospects in Assam. The Acting Chairman, who had personal knowledge of local conditions, addressed the Agents to the Governor in the Vizagapatam and Godavari Tracts explaining the difficulties of the existing system and suggesting further facilities, and a communication on similar lines will shortly be made to the Agent to the Governor in the Ganjam Agency Tract.

Closely connected with the above subject is the scheme sanctioned by the Government of Madras under which coolies in Assam recruited from the areas still remaining closed should be permitted to assist their immediate relatives to emigrate. Lists of such relatives were to be prepared in Assam, and verified locally by tehsildars, after which permission would be accorded to the coolies in Assam to come down and expatriate the persons named. Voluminous lists have been prepared, but here again great difficulty has arisen in identifying the names and addresses given, and the lists are still in process of verification.

The scheme for the regularisation of recruitment in the Feudatory States of Bihar and Orissa is still under consideration, but is approaching conclusion, and it is hoped that final orders will soon be issued.

Cost of sardari recruitment.

14. This important subject was considered at length by a Sub-Committee appointed by the Indian Tea Association, of which the Chairman was a member. The Indian Tea Association referred the Report of the Sub-Committee for the opinion of the Board, who generally approved of the recommendations. The matter is still under the consideration of the Association.

In this connection, it may be mentioned that the attention of the Board was drawn to the practice followed by a few concerns of consigning garden-sardars to local agents with instructions that no advances are to be paid but

that the garden-sardars are to be rewarded by *per capita* bonuses in respect of the recruits which they may bring in. Such garden-sardars generally bring down considerable sums of money with them. The Board consider that this method of recruitment is objectionable, that garden-sardars should be financed only by the local agents and that bonuses, if any, should not be paid till the return of the garden-sardars to the tea estates.

IV.—Illegal Recruitment.

Recruitment by arkatties.

15. Though the operations of *arkatties* have been circumscribed owing to the abolition of the system of recruitment by contractors, a number of them were still active, especially during the earlier portion of the year under review. By a ruse a Supervisor, assisted by the police, caught a gang of seven persons, two of whom held Colonial recruiting licenses, red-handed at Allahabad, all of them being convicted. By a similar ruse at Puri another Supervisor secured the conviction of a well-known *arkatti*. In Sylhet, thanks to the information given by the manager of a tea estate, an *arkatti*, who was hawking coolies for sale, was run to earth by one of the Board's Supervisors, convicted and sentenced to two months' imprisonment. In several instances *arkatties* supplied coolies to garden-sardars working independently of a local agent, some of whom were at large at the beginning of the year under report. An important case of this description was detected at Sewan in Chapra which ended in the conviction of a gang of four persons headed by a Marwari, who obtained coolies from the United Provinces for supply to the dummy garden-sardars. The manager of the tea estate would also have been prosecuted but for the fact that he disappeared on leave. A similar case occurred at Arrah, resulting in the conviction of the offender. A notorious *arkatti* came down to the Ghazipur Agency of the Tea Districts Labour Supply Association with a sardar's certificate and collected a batch of coolies from the persons with whom he was in touch. His prosecution unfortunately failed owing to a technical error. In five cases offers were made to supply coolies to local agents, in two of which prosecutions were instituted and convictions obtained, but in one of these the accused persons were acquitted on appeal. In a third case the license of a Colonial contractor at Bahraich was cancelled. These are the more important cases in which the Board were concerned. There is reason to believe that the policy of harassing illegal recruiters is bearing fruit, as the number of offences reported diminished during the latter part of the year. So far as the Board are aware, there are now no garden-sardars working independently of a local agent; thus an easy channel for the commission of abuses has been blocked. The Central Provinces Administration has lately prohibited recruitment by garden-sardars not working under a local agent, and the Board will consider whether other Local Governments should not be asked to pass similar orders. The fact that the Government of the United Provinces has, as recommended in paragraph 26 of last year's Report, amended the notification published under section 91, Act VI of 1901, the certificates of all garden-sardars being now required to be countersigned in the labour districts, has facilitated control over those working *mala fide*. It may be added that in all cases in which there is reason to believe that the manager of a tea estate is concerned in the malpractices of his subordinates, he is called upon for an explanation and dealt with through the Indian Tea Association or his employer, and in an extreme case his prosecution is recommended.

Coolies visiting their home districts on leave.

16. For many years past it has been the practice on certain estates to grant leave *chits* instead of sardari certificates to coolies proceeding at their own expense to visit their old homes in the recruiting districts, it not being the intention of such persons to engage in recruiting. In practice, however, some of their relatives or friends not infrequently wish to accompany them back to Assam. Difficulties then arise. If the coolie brings these people to a local agent, the latter cannot send them forward unless there happens to be a certificated garden-sardar in the neighbourhood who can nominally recruit them. Indeed, the coolie who brought them in has probably already committed the technical offence of engaging or attempting to engage them. Or, perhaps, the coolie will take these persons back with him to Assam, without producing them before the local agent of the estate, and instances of this have occurred during

the past year. The latter practice is not only totally illegal but most objectionable, as in some cases the persons recruited by the coolie on leave would not have been passed by a responsible local agent, and complaints are subsequently received from the recruiting districts regarding their recruitment. The Tea Districts Labour Supply Association have advised their constituents to furnish coolies proceeding on leave with sardari certificates, and the Board strongly recommend to all employers the adoption of this advice. The possession of such a certificate not only obviates any trouble should recruits be obtained, but is an advantage in that it enables the local agent to keep touch with the cooly and to finance and otherwise assist him on his return journey.

Recruitment nominally for Chittagong and the Duars.

17. No cases of coolies being recruited ostensibly for Chittagong and sent up to Assam came to light during the year, and there is no reason to suppose that this form of illegal recruitment is now being practised. There can be no doubt, however, that from the Ranchi district batches of coolies were smuggled up to Assam under the pretence that they were intended for the Duars. In consequence of the prevalence of rumours to this effect, a Supervisor was deputed specially to investigate the matter, and he eventually succeeded in tracing a batch to a tea estate in the Darrang district. The manager and recruiters were prosecuted, but the case was eventually withdrawn on the Directors of the Company satisfying the Chairman that they were ignorant of the manager's proceedings and on their undertaking to dismiss him and pay Rs. 500 to a war charity. In another case a different procedure was followed. The batch was taken to a plains district in Bengal, and there handed over to a garden-sardar who produced the coolies before the local agent of the Tea Districts Labour Supply Association, it being alleged by the parties that they had left their own district in search of work, and had been recruited locally by the garden-sardar. Subsequent investigation elicited the true facts. It is to be hoped that the action taken in the Darrang case has acted as a deterrent, since no further information of such cases has lately been received. On the other hand, however, this particular form of malpractice is not very easy to detect, and, owing to the depletion of the Board's staff of Supervisors, it has not been possible to maintain the same vigilance as formerly.

V.—Financial.

Collection of cess.

18. For the year under review the cess was again fixed at Rs. 2 on each garden-sardar and emigrant, *vide* Department of Commerce and Industry notification No. 2475-45, dated the 6th May 1916. The cess was collected punctually and without difficulty, that on garden-sardars, including those working in the United Provinces whose certificates are now required to be countersigned in the labour districts, being, since the 1st September 1916, realised by countersigning officers in Assam and remitted by them to the Board. The cess on labouring emigrants was, by the courtesy of the Tea Districts Labour Supply Association and the employers of local agents not belonging to that Association, entirely collected through local agents, to whom the Board beg to tender their thanks, no garden-sardars having been appointed to recruit independently of a local agent.

Refund of cess.

19. During the year under review a sum of Rs. 1,366 was refunded on account of cess erroneously paid, Rs. 202 being in respect of 101 sardars on whom cess was twice realised and Rs. 1,164 in respect of 582 emigrants who had not gone forward, who had absconded *en route* or who had been repatriated either *en route* or within a short time of their arrival on the tea estates.

20. The estimate of receipts provided for an income of Rs. 2,33,133, *viz.*, an opening balance of Rs. 81,000, a Government grant of Rs. 16,133 and Rs. 1,36,000 derived from cess on 27,000 garden-sardars and 41,000 emigrants. The actual credits amounted to Rs. 2,71,875-5-7, the excess being due to the fact that the opening balance (Rs. 1,20,243-2-1) was larger than was anticipated. The cess realised amounted to Rs. 1,31,912 (excluding the refund of Rs. 1,366) which was paid on 31,483 garden-sardars and 34,473 emigrants. In addition, Rs. 1,125 were received on account of interest on a sum of Rs. 75,000 which was placed on fixed deposit with the Bank of Bengal from the 5th of August 1916 to the 4th of February 1917. A further sum of

Rs. 1,485-13-8 was realised as interest on Rs. 75,000 invested in the 5½ per cent. Indian War Loan Bonds on the 4th of April 1917. The Board deemed it desirable to afford the War Loan this measure of support, providing Rs. 50,000 from the surplus funds at credit and borrowing Rs. 25,000 from the Bank of Bengal on the security of the fixed depost of Rs. 75,000. The loan has since been repaid. The contribution payable by the Government of India for the months March to June 1917 has been received since the close of the year.

The total expenditure amounted to Rs. 1,12,461-4-9 as compared with the estimate of Rs. 1,18,190-3. The savings accrued principally under the heads travelling allowance of all classes (Rs. 9,160), and salary of Chairman (Rs. 3,257); while the chief excess payment (Rs. 4,000) was due to the grant of an advance to one of the Supervisors for the purpose of purchasing a motor car, a charge for which budget provision had not been made.

Budget estimate for 1917-18.

21. The budget estimate for 1917-18, which was passed at the meeting of the Board held in March 1917, provides for an opening balance of Rs. 1,59,000 (the actual opening balance being Rs. 1,59,414-0-10), a contribution from Government of Rs. 14,145-9-8, Rs. 1,18,000 as realisations from cess at Rs. 2 on 26,000 garden-sardars and 33,000 emigrants and Rs. 2,250 on account of interest. The latter item is likely to be exceeded as the investment in the War Loan Bonds was made after the budget had been drawn up.

In view of the fact that a substantial balance has accumulated, the Board considered whether a recommendation should not be made to the Government of India that a reduction be made in the rate of cess. It was, however, deemed to be inadvisable to recommend that the rate should be reduced since recruiting prospects during the current year are very uncertain owing to the existence of war conditions, especially the recruitment of Labour Corps and the financial stringency consequent upon the restrictions on imports of tea into the United Kingdom, which are likely to react unfavourably on the receipts of the Board. The poor recruiting results up to date constitute a justification of the Board's attitude in this matter, as under present conditions there is every prospect of realisations on account of cess falling far short of the estimate. The budget provides for an expenditure of Rs. 1,21,116-7-9 and a closing balance of Rs. 1,72,279-1-11. Since it includes expenditure on account of the two Supervisors who have left the service of the Board considerable savings may be expected.

VI.—Miscellaneous.

Transit arrangements

22. The special Supervisor appointed to supervise the transit routes between Assam and the recruiting districts made frequent tours prior to his deputation to military duty, and did much useful work in drawing attention to defects and suggesting improvements which were brought to the notice of the railway administrations concerned with satisfactory results.

The Eastern Bengal Railway authorities have now completed their arrangements to facilitate coolie traffic, and they will be brought into operation when they receive an intimation from the Tea Districts Labour Supply Association that the volume of traffic warrants their adoption. At present comparatively few coolies are going up to Assam.

In consultation with the Sanitary Commissioner, Assam, improved measures for notifying the existence of epidemic diseases along the transit routes and for arranging for the vaccination of emigrants from areas infected with small-pox have been adopted.

Conclusion.

23. The Board again wish to tender their thanks to the Local Governments and their officers, with whom they deal, for their courtesy and support, as also to the Indian Tea Association and Tea Districts Labour Supply Association for the assistance which has been so readily afforded them.

WE, the undersigned Members of the Select Committee, to which the Bill to supplement and amend the Bengal Tenancy Act, 1885, was referred, have considered the Bill and the papers noted in the margin, and have the honour to submit this, our Report, with the Bill, as amended by us, annexed hereto. In reprinting the Bill, all changes made by us have been underlined. The more important alterations are explained below.

2. *Section 49A.*—When the Bill was introduced in Council, objection was taken to the indefinite scope of the proposed Act. Many of the opinions received suggested that aboriginals should be defined. The section has been re-drafted to show that the Bill is primarily intended for the Sonthals of the districts of Birbhum, Bankura and Midnapore. Other castes and tribes to which the Bill may be applied have been specified. Provision has also been made for withdrawing the provisions of the Chapter if the occasion should arise.

3. *Section 49E.*—The period "nine" years has been reduced to "seven" in conformity with the Chota Nagpur Tenancy Act, 1908.

4. *Section 49F.*—This section has been re-drafted to make the meaning clearer and also to provide on the lines of section 49 of the Chota Nagpur Tenancy Act, 1908, for the transfer of land by an aboriginal tenure-holder, raiyat or under-raiyat by private sale, gift or will. Provision has also been made to make it clear that this section does not validate any transfer otherwise invalid.

5. *Section 49H.*—The change in section 49H (*2*) (*b*) is intended to meet the objection which has been taken to the interference with the right of settlement enjoyed by the landlord and to the indefinite discretion allowed to the Collector. The re-draft makes it clear that if the Collector after first endeavouring to restore the land to the original owner or his heir, finds himself unable to do so, he will make over the land to the landlord for settlement subject to the provisions of section 49J. A proviso has been added to the effect that if the landlord does not exercise his right within one year the Collector may, within six months of such failure, settle the land with an aboriginal on behalf of the landlord. If the Collector fails to find an aboriginal tenant, an unrestricted right of settlement of the land will then vest in the landlord.

6. *Section 49J.*—Sub-section (*1*) of this section as re-drafted indicates the procedure for the settlement of the land which vests in the landlord under section 49H (*2*) (*b*), or which is surrendered or abandoned by an aboriginal tenant. No action by the Collector is contemplated if the landlord settles the land with an aboriginal. In clause (*ii*) of the same sub-section provision has been made for the settlement of the land by the landlord with a person who is not an aboriginal or for the retention of possession by the landlord of any such land, in both cases subject to the approval of the Collector.

7. *Section 49K, proviso* (*b*).—In view of the new provision in section 49A (*1*) applying the proposed Act to the Sonthals of the districts of Birbhum, Bankura and Midnapore, a date is necessary in their case as well as in the case of other notified aboriginals, after which all transfers except those authorised by the proposed Act will be illegal. One year is considered sufficient for this purpose.

Proviso (*c*) has been made more concise.

8. *Section 49L.*—In view of the objections to the transfer of sales in execution of decrees to the Collector, the provision for transfer of a decree to the Collector has been omitted, and the Court executing the decree has been authorised to grant reasonable time for payment.

9. *Section 49N.*—We have omitted this section as being unnecessary.

Section 49O.—We have amplified this section on the lines of section 8 of the Chota Nagpur Tenancy Act, 1908 [illegible] or want of jurisdiction.

11. *Section 49P.*—We have altered this section for the reasons given for the alterations made in section 49K, proviso (*b*).

12. We recommend that the Bill, as now amended by us, be passed.

REPORT ON THE ADMINISTRATION OF THE STAMP DEPARTMENT DURING THE THREE YEARS ENDING THE 31ST MARCH 1917.

NOTIFICATION.

No 2563S.R.—The 14th November 1917.—The following extracts from the Report on the Administration of the Stamp Department for the triennium ending the 31st March 1917 are published for general information.

J. DONALD,
Secretary to the Govt. of Bengal.

No. 264T.-S.R., dated Darjeeling, the 8th September 1917.

From—The HON'BLE MR. J. DONALD, I.C.S., Secretary to the Government of Bengal, Financial Dept.,

To—The Secretary to the Government of India, Finance Dept.

I AM directed to submit for the information of the Government of India the following report on the administration of the Stamp Department during the three years ending the 31st March 1917.

2. *Important changes in the law and in the rules.*—The stamp revenue during the period under review was realised under the Indian Stamp Act, 1899 (Act II of 1899), and the Court-Fees Act, 1870 (Act VII of 1870), as amended by subsequent enactments. During this period the Court-Fees Act, 1870, was amended by Act XVII of 1914 and the Indian Stamp Act, 1899, by Act XIII of 1916.

Financial Results.

8. The receipts, which, in 1913-14, the last year of the preceding triennium, were Rs. 2,21,97,277, fell to Rs. 2,05,06,462 in 1914-15, but rose to Rs. 2,26,77,548 in 1915-16. During the last year of the period under review the receipts as reported by the Accountant-General, Bengal, *plus* Rs. 4,60,972 paid to the Calcutta Improvement Trust being the collection of the increased stamp duty leviable under section 82 of the Calcutta Improvement Act, 1911, and also Rs. 4,99,000, the Provincial share of the sale-proceeds of unified stamps credited to non-postal revenues, amounted to Rs. 2,46,13,677, an increase of Rs. 19,36,129 or 8·5 per cent. as compared with those of 1915-16, and of Rs. 41,07,215 or 20·0 per cent. over those of 1914-15. The increase occurred both under judicial and non-judicial stamps.

A.—Judicial Stamps.

10. The sale-proceeds of Court-fee stamps (excluding stamps for copies) rose steadily during the past three years. The receipts during 1916-17 were Rs. 1,56,85,461 against Rs. 1,47,36,832 in 1915-16 and Rs. 1,35,28,272 in 1914-15. Compared with 1915-16, there was an increase in 1916-17 in all divisions except the Presidency. The decrease in that division, which occurred chiefly in Calcutta, was due to the opening of the Patna High Court, and also to the fact that large probate duties were realised in 1915-16. In the other divisions the increases are ascribed partly to the institution of a large number of civil suits and partly to work in connection with settlement operations. The receipts from the sale of stamps for copies fell from Rs. 6,84,582 in 1914-15 to Rs. 6,74,477 in 1915-16, but rose to Rs. 7,10,527 in 1916-17. The receipts from the sale of plain paper rose from Rs. 3,07,099 in 1914-15 to Rs. 3,23,513 in 1915-16 and to Rs. 3,55,566 in 1916-17.

B.—Non-Judicial Stamps.

11. The revenue derived from the sale of non-judicial stamps during 1916-17 showed an increase of Rs. 9,18,627 or 13·2 per cent. as compared with 1915-16, and of Rs. 18,74,811 or 31·3 per cent. over that of the first year of the triennium. The increase was shared by all classes of stamps except "Forms for agreements and contracts chargeable with two-anna coloured impressions."

12. (*a*) *Impressed stamps.*—The receipts from the sale of impressed stamps (the most important item among non-judicial stamps) showed a progressive increase during the past three years. The revenue which amounted to Rs. 33,81,392 in 1914-15 rose to Rs. 39,32,854 in 1915-16, and to Rs. 41,93,529 in 1916-17. The increase is generally attributed to the execution of a larger number of sale and mortgage deeds owing to high prices of food-stuffs, to the settlement operations in some districts, and to the increased stamp duty levied under the Calcutta Improvement Act on instruments relating to immoveable property situated in the suburban areas of Calcutta.

13. (*b*) *Hundis or inland bills-of-exchange.*—The revenue derived from the sale of stamps from *hundis* or inland bills-of-exchange rose steadily

during the triennium. The receipts during 1916-17 were Rs. 1,81,459, an increase of Rs. 59,762 over those of 1915-16, and of Rs. 84,185 over those of 1914-15.

14. (*c*) *Impressed labels or special adhesive stamps.*—The receipts from the sale of these stamps during 1916-17 showed an increase of Rs. 3,53,157 or 26·2 per cent. as compared with those of 1915-16, and of Rs. 3,91,806 or 29·9 per cent. over those of 1914-15. These stamps are principally used in Calcutta where there was an increase of Rs. 3,53,653 in 1916-17, as compared with 1915-16, attributed mainly to the additional stamp duty levied under the Calcutta Improvement Trust Act and to the general prosperity of trade.

15. (*d*) *Foreign bill stamps.*—The receipts from these stamps, which are sold only in Calcutta and Chittagong, amounted in 1916-17 to Rs. 1,87,274, and exceeded those of the preceding two years by Rs 43,583 and Rs. 46,475, or 30·3 and 33·0 per cent., respectively. The rise in the prices of articles imported into India during the war, and the growing scarcity of freight account for the increase under this head.

16. (*e*) *Share-transfer stamps.*—Sales of these stamps, which are used for the payment of stamp duty on transfers of shares of public companies and associations, are practically confined to Calcutta. The revenue rose from Rs. 1,18,008 in 1914-15 to Rs. 3,67,454 in 1915-16 and to Rs. 6,11,407 in 1916-17. The increase is attributed to considerable speculation in jute mill shares, the value of which has swollen abnormally owing to the enormous profits made by the mills. The appropriation of first class coal by the Government towards the close of the past year gave a spurt to the shares of coal companies also and added to the sale of stamps on transfers.

17. (*f*) *Stamps for legal practitioners' licenses.*—The receipts from the sale of these stamps fell from Rs. 1,29,711 in 1914-15 to Rs. 1,27,379 in 1915-16, but rose to Rs. 1,31,330 in the last year of the triennium.

18. (*g*) *Notarial stamps.*—These are one-rupee foreign bill stamps overprinted with the words "Notarial" under rule 17 (*d*) of the rules issued with the notification of the Government of India No. 1140—F., dated the 14th August 1914. They were sold in four out of 27 districts in 1916-17. The sales of the year amounted to Rs. 1,740 in comparison with Rs. 1,251 and Rs. 2,215 during the two previous years, respectively.

19. (*h*) *Forms for agreements and contracts chargeable with two-anna coloured impressions.*—In accordance with rule 8 of the rules published with the notification cited in the foregoing paragraph, skeleton forms of instruments, chargeable with a duty of two-annas under article 5 or 43 of schedule I of the Indian Stamp Act, 1899, are impressed with two-anna coloured impressions in the office of the Controller of Printing, Stationery and Stamps, Calcutta, on receipt of certificates of payment from a Government treasury. The income from this source rose from Rs. 2,527 in 1914-15 to Rs. 3,682 in 1915-16, but fell to Rs. 3,388 in 1916-17.

20. (*i*) *Forms for cheques and receipts.*—The sale of these forms, which are stamped with one-anna coloured impressions by the Controller of Printing, Stationery and Stamps, Calcutta, in accordance with the rule cited above, brought in Rs. 1,94,392 in 1916-17. The receipts exceeded those of the previous two years by Rs. 20,891 and Rs. 19,356 or by 12·0 per cent. and 11·1 per cent., respectively. The increase occurred chiefly in Calcutta.

21. (*j*) *Miscellaneous receipts.*—The receipts under this head were mainly composed of realisations under section 35 and sections 32, 37, 40 and 41 of the Indian Stamp Act, 1899. The income from these sources rose from Rs. 1,33,262 in 1914-15 to Rs. 2,26,250 in 1915-16, but fell to Rs. 1,58,710 in the last year of the triennium. The decrease occurred chiefly in Calcutta.

Arrangements for the sale of stamps.

22. * * * * * *

The total number of vendors engaged in the sale of judicial and non-judicial stamps during the year 1916-17 was 5,250 against 5,092 and 5,232 in the preceding two years. The expenditure on discounts allowed to stamp vendors during 1916-17 was Rs. 3,89,246, which exceeded that of the preceding two years by Rs. 33,512 and Rs. 75,903, respectively. The increase followed on the rise in the sale of judicial and non-judicial stamps. The average discount per vendor during the triennium under report was Rs. 68 against Rs. 69 in the preceding period.

Punitive action of the Courts and Revenue Officers.

23. * * * * * *

The total number of cases dealt with by the Civil Courts increased from 2,002 in 1914-15 to 2,209 in 1915-16 and 2,329 in 1916-17. The duty and penalty realised by the Civil Courts during the last year of the triennium was Rs. 16,653, showing an increase, as compared with the previous two years, of Rs. 2,899 and Rs. 2,992, respectively. There was an increase of 414 in the number of cases decided and of Rs. 4,478 in the duty and penalty realised by Revenue Officers in 1916-17, as compared with the figures of the preceding year, and of 534 and Rs. 40,125, respectively, as compared with the figures of 1914-15. The increase, both in the number of cases and in the amount of realisation, is attributed to the vigilance of the Courts, and to more careful examination of documents by officers of the Registration Department.

24. * * * * * *

The number of cases instituted in 1916-17 was 257, in which 266 persons were brought to trial against 332 and 342 in 1915-16 and 740 and 758 in 1914-15. Compared with the year 1915-16, the number of prosecutions in 1916-17 was less in all divisions except the Chittagong Division, where the number remained unchanged. It is said that the public are gradually taking greater precautions to stamp their documents properly. The fines imposed during the year amounted to Rs. 2,419, showing a decrease, as compared with the previous two years, of Rs. 339 and Rs. 2,050, respectively. The amount paid in rewards in 1916-17 was Rs. 1,240 against Rs. 1,080 and Rs. 2,087 in the previous two years, respectively. No rewards were paid outside Calcutta.

Working of section 19H added to the Court-Fees Act, VII of 1870, by Act XI of 1899.

25. * * * * * *

The number of cases reported to the Collector showed a gradual decrease from 1,934 in 1914-15 to 1,729 in 1915-16 and to 1,617 in the last year of the triennium. The number of cases in which enquiries were instituted and the number of enquiries completed fell from 1,713 and 1,774 in 1914-15 to 1,558 and 1,474 in 1915-16, but rose to 1,901 and 1,605 in 1916-17. The amount of deficit Court-fees realised rose from Rs. 54,394 in 1914-15 to Rs. 61,385 in 1915-16 and to Rs. 89,641 in 1916-17. Of the cases reported during 1916-17, including those pending at the beginning of the year, 72·8 per cent. were completely enquired into; the corresponding percentages in the preceding two years were 67·7 and 75·1. The proportion borne by the deficit duty required to the amount originally realised was 12·3 in 1916-17 and 18·3 and 8·4 in the preceding two years. There was a marked increase in the realisation of

defalcations in Calcutta during the last year of the triennium under review, due mainly to the creation of a special post and the appointment of a Deputy Collector to conduct enquiries regarding the valuation of the estates in respect of which probates and letters of administration are applied for in the High Court. No case of serious undervaluation has been reported during the triennium.

Education.

SIR,

In the Home Department letter No. 380-C., dated the 25th January 1917, local Governments were informed of the proposals of the Government of India as regards the procedure to be followed in dealing with the report of the Public Services Commission. In paragraph 3 of that letter it was stated that the Government of India would, in the first place, form provisional

nclusions regarding the Commission's recommendations involving general inciples and of general application and that local Governments would be formed of these conclusions at an early date. It is hoped that the Government of India will shortly be able to make a communication to local Governments in accordance with the arrangement above described.

2. In forwarding the report of the Commission to the Government of ndia in October 1916, the Secretary of State suggested that they should ve early consideration to the recommendations of the Commission regarding the Education Department. He added that the recommendations nbodied in annexure IV to the Commission's report aimed at removing any anomalies now existing in this service which constituted a source of scontent and appeared to cause embarrassment to Government. The overnment of India, in submitting their proposals for the procedure to be llowed in dealing with the report, informed the Secretary of State that ndeavour would be made to expedite preliminary secretariat work as much possible, and that his special request for early consideration of the Education Department case had been noted. The Secretary of State, moreover, dealing with another case in January 1917, invited a reference to his evious suggestion and expressed a hope that the Government of India ould be able to give very early consideration to the proposals of the Commission regarding the educational services.

I am accordingly directed to say that the Government of India desire, in e case of the Education Department, to depart from the general line of ocedure pursued in dealing with the report as a whole, and I am to address ou regarding certain important proposals relating to that Department. is not proposed in the present communication to deal with questions leave or pension, as these must be decided largely in accordance with the inciples adopted for other services, nor is it proposed to touch for the esent on the service for women which the Commission have recommended. he Subordinate Educational Service again was not included in the scope the Commission's enquiries. The present reference is intended to deal ith the main features of the constitution of the Department *qua* the Indian' and 'Provincial' Services. Though it will be open to local overnments to make suggestions regarding any of the further detailed commendations of the Commission bearing on these main features, the ject of the Government of India at the present stage is to obtain the views local Governments at the earliest possible date in respect of the fundaental principles on which the Department should be recognised. The commendations of the Commission on this subject are summarised in paraaph 36 of their annexure IV, and the present communication is concerned ainly with Nos. (*i*)—(*viii*), (*x*) and (*xviii*) of the recommendations as there ummarised.

3. Apart from a certain number of miscellaneous appointments outside ne cadre, the existing Department consists of two branches, the collegiate nd the administrative, and transfers from one of these branches to the other re fairly frequent in some provinces, but rare in others. The higher anch of the Department again consists of two services, the Indian ducational Service and the Provincial Educational Service, which are nomially parallel to each other but in practice, at any rate so far as pay is oncerned, are quite unequal. The former service is recruited in England nd consists almost entirely of Europeans who draw a salary rising from s 500 to Rs. 1,000 per mensem with certain additional allowances. The tter service is recruited in India and its members draw as a rule a graded ay varying between Rs. 200 and Rs. 700. Proposals for the reorganisation f these services may be framed either in the way adopted by the Commission, though not necessarily in close accord with their specific proposals, or n alternative lines such as are suggested below. The Governor-General Council desires that local Governments will take into their consideratio oth these alternative proposals and favour him with their opinion em.

4. The proposals made by the Commission are explained in Annexure V of their report and need not be repeated here in detail. The Commission adhere to the present distinction between the collegiate and administrative branches, but they desire that transfers from one to the other should not be permitted except under sanction of Government to meet the public interest. Moreover, in addition to the main cadre of the Education Department to which reference will presently be made, they recommend the

organisation of (*a*) a body of 20 professors recruited either in England or in India, and (*b*) special recruitment to certain posts which would otherwise fall under class II.

5. As regards the former, it will be noticed that the Commission attached considerable importance to this portion of their scheme as representing a basis for building up a system of higher studies and original research. But they found great difficulty in deciding the relationship of these posts with the existing system of affiliating universities. They suggested, therefore, that such posts might be attached to (*a*) Government colleges, or (*b*) the affiliating universities along the lines now attempted by the Universities of Calcutta, Madras and Allahabad, or (*c*) a post-graduate institute of research.

These proposals are open to obvious criticisms. For example, a Government college professor is, and must be, insufficiently in contact with other colleges to be able to influence the higher teaching of the university as a whole; again, a professor of an affiliating university is almost entirely out of touch with the main stream of college work and also finds it difficult to conduct research work with students whose past training he has been unable to influence or to guide; and a research institute of the character contemplated by the Public Services Commission is impossible of early realisation. It might also be urged that the proposed body of higher professors will tend to debase the position of the ordinary college professor, whose duties are possibly of even greater importance and difficulty than those of the former. The Government of India, however, are in agreement with the Commission in thinking that there is a real need for a body of specialists in the several departments of study who would improve the methods of instruction in colleges and the courses of study in the universities, and would also inculcate a spirit of research, especially in those subjects termed "orientalia" in which India should take a leading part. It will probably be more convenient to consider at a later date the constitution of this class of posts and the method in which they should be brought into being, but it is impossible to neglect altogether this issue in the present reference.

6. So, too, as regards the other special posts referred to in paragraph 3 of annexure IV, it will probably be necessary under any form of organisation to make provision for a class of appointment outside the cadre, as is indeed done under present arrangements. The Government of India do not ask for any detailed proposals regarding the exact number of posts which should be included in this class. If, however, any special posts of importance should be so included to which the Commission have not referred, it is hoped that local Governments will specify the character of such posts.

7. Outside the subsidiary but important matters to which reference has been made, the main proposals of the Commission will result in the amalgamation of the Indian Educational Service and the Provincial Educational Service and, after this amalgamation has been effected, in a division into class I and class II, the distinction between which should be based on the type of work to be performed by each officer. The manner in which this distinction could be carried out is indicated with a certain amount of detail in paragraphs 5 and 6 of annexure IV. The new class I proposed by the Commission is designed to consist, in the first place, of 264 appointments, including (*a*) the present Indian Educational Service, comprising 199 posts, whose incumbents would be transferred *en bloc* to the new class I, and (*b*) posts equal to about one-third of that number to be filled by persons recruited in India either direct or by promotion from the Provincial Service.

Regarding future recruitment to these 264 posts, it is recommended in paragraph 11 of the annexure that the present proportions of recruits obtained in Europe and India respectively, which would under the adjustment above indicated amount roughly to 3 : 1, should be maintained in the future for the existing number of posts taken as a whole, on the understanding that if no candidate from Europe of sufficient merit applied for any particular vacancy which would ordinarily be filled in Europe, there should be no hesitation in making the appointment for that occasion only in India, provided that a better candidate were there forthcoming. It is also recommended that additional posts which may be found necessary hereafter should be filled half by men trained in one country and half by men trained in the other. In this way it was expected that the percentage of the service recruited in India would gradually increase while that taken from Europe would diminish in proportion.

On the administrative side half of the class I posts to be filled up in India are to be reserved for direct recruits, and half given to class II officers provided qualified candidates are available. On the collegiate side, the proportion is to be two-thirds and one-third respectively (paragraph 15 of annexure).

Class II is to be as large as the work to be done requires (paragraph 7), and recruitment for it is to be entirely in India (paragraph 12). The proportion of class II posts to be filled by promotion from the Subordinate Service is left to be determined by the local authorities (paragraph 15).

8. It is proposed by the Commission that both classes should be paid on an incremental scale (paragraph 21). For class I officers who are recruited in India a general scale of Rs. 350—50—1,250 a month is recommended, whilst for those who are recruited in Europe, whether statutory natives of India or not, the Commission propose a salary of Rs. 550—50—1,250 a month. This would bring all officers, irrespective of any selection, on to equal grades of pay after 18 years' service at the latest (paragraph 22). The Commission also provide for selection grades for all alike, wherever recruited and whether statutory natives of India or not, of 10 per cent. of the cadre on Rs. 1,250—50—1,500, and of a further 10 per cent. on Rs. 1,500—50—1,750 a month in all the major provinces except Assam.

For class II the same general scale is proposed as has been recommended for the provincial civil and police services and other such services which are recruited in India. This would give a scale for all provinces, exclusive of Burma, where a special scale is proposed, of Rs. 250—$\frac{40}{3}$—450—$\frac{50}{3}$—500 a month for the main body of officers; with selection grades of Rs. 500—40—700 a month for 15 per cent. of the total cadre (paragraph 22). These changes are estimated to involve an additional cost of over 9 lakhs per annum (paragraph 23).

9. Such are the main features of the organisation proposed by the Commission and the Government of India would be glad to receive the comments of local Governments on the advisability or otherwise of following the principles laid down. It is desired that special consideration be given to the following points:—

(*a*) Whether a distinction between class I and class II can in practice be made according to the work done in the manner suggested by the Commission and whether the scales of pay proposed for the two classes are suitable.

(*b*) In this connection special attention should be given to the proposed differentiation in pay between the members of class I recruited in England and in India respectively and to the general considerations put forward in paragraph 55 of the Report. In other words, is there to be a distinction of pay in class I, *e.g.*, according as its members are recruited in England or in India or should all officials of this class draw the same pay?

(*c*) In the event of there being a distinction of pay between officers who are deemed to possess European qualifications and others, should Indians be admitted to the former category merely on the ground that they happen to be in Europe when recruited or should there be a condition that Indian officers deemed to possess European qualifications should have received education in Europe for a specified number of years?

10. The Government of India desires that the Commission's scheme should be examined as above suggested, but they recognise that it appears open to criticism in various respects, of which the following appear to be some of the most important:—

(*a*) The Public Services Commission of 1886-7 were of opinion that the recruitment of educational officers in England should be confined as far
sible to principalships of colleges and professorships in those branch
ruing in which European standards of knowledge had not been
India. Officers so recruited in England were to receive a scale

officers recently appointed in Europe to the Service. By allotting one-quarter of the new class I posts to members of the present Provincial Educational Service or others recruited in India, by giving some definite opportunities for promotion in the future to men of proved merit in class II, and by insisting that, for the posts for which recruitment will be made in England, Indians trained in that country will be eligible, the Commission have attempted to remedy the defects of the old system, while it may be hoped that with the improved conditions of service a better type of candidate for the class I posts will be forthcoming than in the past. The question is, however, whether the Commission's proposals are sufficiently effective, and one point that needs special consideration is that referred to in paragraph 9(*a*) above. It may often be desirable that the teaching of the junior classes in colleges should be conducted by the more experienced and competent officers, and it does not therefore follow that participation in the higher teaching is a claim to inclusion in class I. It is in connection with problems of this sort that the opinions of local Governments will be specially valuable, and the Governor-General in Council hopes that they will be able to suggest some practical means of distinction between class I and class II which will not depend primarily upon racial grounds.

(*b*) Critics of the new proposals may again contend that the main bulk of the educational work in this country should be discharged by Indians serving on Indian rates of pay, and that its guidance and control should be very largely in their hands. Europeans, they would argue, however experienced or scholarly, are unable to understand adequately the needs of Indian students or to enter into their lives with sufficient intimacy or sympathy. Such critics would therefore urge that instead of placing the Education Department, as suggested by the Commission, in that group of services in which a mixture of East and West is desirable, it should be included in the third of the categories described in paragraph 82 of the Commission's report. On the other hand, it may be maintained that while the bulk of the educational service in India should ultimately be manned by Indians recruited in this country and that a knowledge of the minds and habits of the people may be of more value than European training, this contention is under present conditions true only up to a certain point. A uniform service working under Indian rates of pay might reach only a dull level of mediocrity. It seems essential at the present moment to attract the best possible material, European as well as Indian, into educational employ.

On the scholastic side the establishment of some twenty research professorships could do little to raise the general level of university teaching, especially under the affiliating system. For the present therefore, until the new type of unitary or teaching universities has been more generally evolved in India, it seems necessary to give more scope to the capacity of efficient college professors.

Similarly, on the administrative side, provision ought, it is urged, to be made for Western capacity and experience. Even if it were accepted that this branch of the service should in the main be organised upon lines primarily contemplating an Indian staff, it appears of importance to pitch the salaries of some of the more influential and responsible posts on a scale which will attract the really able men, whether Indian or European.

(*c*) A further criticism of the proposals is that they are not adapted to the general trend of Indian educational policy, at any rate in the region of higher education. The progress of the Indian universities in the matter of higher teaching, both in the number of students attending the classes and in the specialised nature of the courses, demands more and more the assistance of highly specialised scholars and a certain measure of concentration of institutions. In paragraph 45 of their educational resolution of 1913 the Government of India declared their preference for the teaching as distinguished from the affiliating university. The proposals of the Dacca and Central Provinces Universities Committees, the Patna University scheme, now under consideration, and the recent changes made in Calcutta for post-graduate teaching are all in the direction of an increased university control over certain forms of teaching and of a certain measure of concentration. Should this line of policy be developed in future and be extended to other parts of India, it is urged that the establishment of a Government service, with its regular conditions of pay, prospects, promotions and transfers, will not be consistent

with the needs and requirements either of new unitary and teaching universities or of reformed affiliating universities. If universities are to conduct certain forms of teaching, they should obviously do so through the agency of their own professors and not through the members of an outside service.

There seems, therefore, some need for re-adjusting the present proposals to suit such future possibilities. It is true that there are many difficulties in the way of the fulfilment of such a policy, but it would be unwise to embarrass its development by the reconstitution of the educational services on lines ill-adapted to the requirements of the universities of the future.

(*d*) It has also been suggested that the line of distinction between the administrative and professorial sides of the service should be drawn even more clearly and decisively than has been done by the Commission. Transfers between the two have evoked a certain amount of criticism in the past and, under any circumstances, are open to some objection. There is to-day an increasing need for specialised knowledge which a man, who has been an inspector for some years cannot hope to have retained. Again, a professor can scarcely hope to attain the necessary intimacy with the Indian system of administration and that satisfactory knowledge of educational theory and practice, which are required from a successful educational administrator.

On the other hand, it may be urged that it is undesirable to have too rigid a line of distinction; that the men in the higher administrative posts would be the better for having had some actual experience of teaching in India; and that professors would profit by having had some experience of administrative work.

(*e*) It may be contended also that the proposals are rather too rigid and that too little scope is given for the employment of men of experience or of ripe scholarship from outside for short periods of time. Indian university education needs, at times, the services of men who have already achieved some distinction in scholarship or some experience of educational administration in other countries.

11. In setting out the above criticisms the Government of India must not be deemed to be prejudging the matters in issue. Their present object is merely to clarify these so as to assist in obtaining the well considered opinions of local Governments. The same remarks apply to the alternative suggestions, which follow, which are intended to elucidate opinion and not to forestall it. Nor in so far as they may prove acceptable, are they necessarily intended for immediate adoption but rather to indicate what may reasonably be accepted as the main policy of future development. For without a definite goal in view it is impossible to devise any satisfactory scheme for the reorganisation of the educational services.

12. (A) It has already been suggested in paragraph 6 of this letter that a certain number of posts in the Indian Educational Service should be turned into special appointments. In accordance with the Commission's proposals, a number of posts roughly equivalent to one-third of the Indian Educational Service (reduced by the exclusion of special appointments) would be added and filled in India. It might be considered whether a larger proportion of Indians might not at once be obtained by the additional transfer of the posts in the Indian Educational Service now vacant owing to the war and other causes (some 37 in number) to that portion of class I which will be recruited in India either by direct recruitment or by promotion. If this were done, taking into account, on the one hand, the reduction in the cadre by the special appointment of research professors, and the probability, on the other hand, that a considerably larger number of Indians will be appointed in England by the Secretary of State from among those educated in that country, the Indian element in class I would, at the outset, more nearly approximate to the European. The Government of India, therefore, would be glad to hear from local Governments (*a*) whether, in their opinion, it would be possible to obtain from the Provincial Educational Service or by direct recruitment so large a number of suitable Indians in this country, and (*b*) whether it would be to the interests of Indian education immediately to fix the proportion of Europeans and Indians at half and half.

(B) In order to prepare the way for a larger recruitment of Indians than is provided for by the Commission, it would also be necessary to fix a scale of pay which could easily be adapted to such altered circumstances [illegible] a matter of great difficulty to reduce the

scale of salaries after the proportion of officers has become very largely Indian. For class I, therefore, pay on the analogy of that recommended by the Commission (paragraph 38) for services requiring high initial qualifications, *viz.*, Rs. 300—$\frac{1}{2}$°—50—50—1,050, might be accepted, subject to the grant of special allowances for posts of special importance. There might also be a special allowance of Rs. 200 a month for officers recruited in Europe which should be given also to those few Indians now serving in the Indian Educational Service on full rates of pay. Selection grades would be created, as proposed by the Commission, and would be open to members of class I whether recruited in England or in India.

(C) In view of the difficulties referred to in paragraph 5 above, it might be better to hold the twenty research professorships in abeyance, at any rate for the present—a course which would make it the more desirable to accept the Commission's proposals regarding the selection grades. Should, however, the constitution of unitary and teaching universities become the general policy in the future, it would probably be the best course to transfer a number of posts from the selection grades of class I to the establishments of these universities. It would be premature at present to discuss how and by whom appointments would be made to these new posts, but recruitment would no doubt occasionally be from the ranks of class I of the Government service, provided it were possible to find applicants with the necessary specialised qualifications. Such appointments would give a certain number of officers more favourable opportunities for teaching and research than they can have under the existing system.

Similarly, in reference to the administrative side [*vide* paragraph 10(*b*) *ante*] it may be considered advisable by local Governments to treat the directorship of public instruction in the manner proposed in paragraph 26 of annexure IV to the Commission's report.

It might also be considered whether a certain number of the posts which would ordinarily be included in class I should not be removed from the cadre and left open to be filled by any persons who appear to be peculiarly fitted to discharge the duties attached to them, with the addition to the ordinary salary of such allowance as seemed called for by the qualifications and experience of the person specially selected. In other words, special need may arise from time to time for securing the highest possible talent to fill some of the posts in the educational service, such as a particular inspectorship or the principalship of an important college or the headmastership of a certain high school. There should, in such cases, be a certain latitude of selection which would afford to local Governments the scope necessary for securing the services of the most highly qualified persons irrespective of race, creed or departmental claim. The Government of India would be glad to receive suggestions from local Governments as to what posts might thus be earmarked and some rough estimate of the additional cost involved.

13. The object of the suggestions made in the preceding paragraph is primarily to effect, as regards the immediate future, a stage of transition between the past, when education was very largely in the hands of Europeans, and a time when the reverse will be the case. They are also aimed at laying down a general policy for the future organisation of the Department. It is also desirable to have always in view the possible development of affiliating into teaching universities.

Should the proposals above indicated be carried out, it is possible to postulate (*a*) a service consisting of two classes carrying respectively rates of pay amounting to (1) Rs. 550 rising to Rs. 1,050 with the allowances suggested in paragraph 12 (B) above and selection grades up to Rs. 1,750, and (2) Rs. 250 rising to Rs. 500 and, in the selection grades, to Rs. 700 (*b*) a small number of posts on the administrative side which will be filled up by Government with an eye to efficiency and merit either than to the claims of a special service and whose incumbents would keep the Indian system of education sufficiently in touch with those of other countries, and (*c*) a number of specialist professors attached to teaching universities, who by their scholarship and experience would maintain a high standard of teaching in the higher grades, and influence the general administration of the universities.

With this end in view I am to invite the opinions of local Governments on these proposals in general and also on the special points (*a*) whether the

system of what may be called European allowances is practicable, (*b*) whether the rates of salary suggested are suitable, and (*c*) whether the general idea underlying sub-paragraph (C) of the preceding paragraph is based on sound principles.

14. The Government of India would be glad to learn the views of each local Government, firstly, as to the class of scheme which they would advocate, *viz.*, a scheme on the lines proposed by the Commission or one on the lines sketched out in paragraph 12 of the present communication, and, secondly, whether in the scheme advocated by the local Government any changes of substance are proposed in modification of the outline given in this letter. It is requested that a reply to this letter may be despatched so as to reach the Government of India by the 30th November next.

15. I am in conclusion to suggest for the consideration of

His Excellency the Governor in Council
His Honour the Lieut.-Governor in Council, etc.

that, in view of the importance which His Majesty's Secretary of State attached to the early submission of proposals in regard to the Department of Education, it might be desirable, with a view to expedite matters, to appoint a strong provincial committee, on which influential Indian opinion should be represented, to consider and report to the local Government upon the proposals dealt with in this letter.

16. The Government of India desire to elicit public opinion to the fullest extent upon the subject of the educational services, which has long attracted widespread interest. They have accordingly decided to publish this circular letter in the forthcoming *Gazette of India*.

I have the honour to be,
SIR,
Your most obedient Servant,

H. SHARP,
Offg. Secy. to the Govt. of India.
